Local Items

A meeting of the directors and members of the Chinook Agricultural Society will be held on Saturday evening, May 23, in the Phone Office. Every member is requested to attend.

J. T. Kerr was a visitor in Calgary on Sunday.

Mrs. S. H. Smith and baby returned from Calgary last Saturday.

J. W. Deman made a business trip to Hanna last Thursday.

Mrs. W. J. Blair, of Sedalia, was a visitor at the home of her mother, Mrs. M. Blair over the week-end.

Mr. Ed. Russell, who has been spending the past three weeks in the Chinook district, returned to his home in Vancouver last Tuesday.

Wheat seeding in the Chinook district is practically completed. Preparation for oats now being made. Wheat on several farms in the district is already above the ground.

Mrs. C. A. Gilders and little daughter Phyllis, of Rosetown, is visiting at the home of Mr. and Mrs. Robt Smith.

The Junior C.G.I.T. visited on Friday evening at the home of Mrs. Rennie. The girls had an enjoyable "hike", then were entertained at a dainty lunch by their hostess. The group plan to make a quilt, which will be later donated to a hospital.

Dr. C. McKay, Ph. D., of the Saskatchewan University, was a guest at the home of Mrs. E. Graham over the week-end.

L. S. Dawson and D. McKenzie returned Saturday from Marsden, Sask., where they had gone the previous Thursday by auto. Mrs. F. McKenzie accompanied them from Chinook to her home in Marsden.

Mr. A. O. McNeil attended the Youngstown District meeting of the Methodist Church held in Oyen last Friday.

A. W. Clippsham left on Tuesday morning for Vulcan.

Mr. Lorne Proudfoot purchased a new Ford Touring car this week from the local dealers, Messrs. Cooley Bros.

O. L. Mielke was a visitor in Drumheller over the week-end.

R. A. Hart arrived in town on Wednesday from Clive, to join the staff of the Union Bank here.

Village of Chinook

BY-LAW No. 5

1. It shall not be lawful to allow any horse or cattle to run at large at any time.

2. Any animal (horse, cow, sheep, hog, goat, poultry) found at large may be impounded and sold, unless damages and fees are sooner paid.

3. The poundkeeper shall not deliver any animal until all fees and claims have been paid.

4. All claims for damage must be in writing and delivered to the poundkeeper.

The Village Council instruct all residents to comply with the above By-law.

By Order of the
Village Council.

Pools Ask Support of Business Organizations

Support of the boards of trade and the various service clubs in the towns, and the agricultural societies in the drive to secure memberships for the new provincial dairy, livestock and poultry pools, is being asked by the joint organization committee of the pools, of which A. B. Claypool, M.L.A., is chairman. Letters were dispatched to all these organizations during the past week, soliciting whatever support and assistance their members might be able to give in aiding the pools to reach their objective when the concentrated drive takes place during the three weeks from June 8th to 28th. It is felt that the business organizations will gladly support the pool movement as one essential in making Alberta a more attractive place for incoming settlers, as well as improving the conditions of those already on the land.

CARD OF THANKS

We desire to thank our many friends in Chinook and district for their kindness and sincere sympathy expressed during our recent sad bereavement, also the Ministers and Choir for the beautiful service at the funeral.
John K. Yeats and Family.

Many Homesteads Taken

Seventy-one homesteads were taken up at the Edmonton land office during the month of April. Three soldier grants were also filed on.

Langford U.F.A. Sports Day Wednesday June 3

The Langford U.F.A. will hold their annual sports day on Wednesday, June 3. A good program of events is being arranged and a day of real enjoyment is assured those who attend. See posters for full particulars.

Ladies Card Club Elect Officers

At the final meeting for the season of the Chinook Ladies Card Club held last week at the home of Mrs. Robinson, the following officers for the ensuing year were elected: President, Mrs. Vanhook; Vice-president, Mrs. E. E. Jacques; Secretary-treasurer, Mrs. Rennie. The ladies plan to hold a social in the near future when they will entertain their husbands.

Chinook Village Council Make Good Move

The Chinook Village Council have made a good move when they purchased a right of way across the corner of Lensegraf's farm for a road entering the town from the east. When this road is completed there will be many automobiles which now pass by our town that will come into town and these travellers will leave many dollars with us.

RED ROSE COFFEE "is good coffee"

The Richer Life Of The West

The people of the prairie provinces of Canada are engaged in the very large task of converting an empire of vacant or sparsely settled territory into a thriving nation, and in doing so are seeking to lay foundations firm and true upon which the great structure of the future shall be erected. While much has been accomplished, the days of the pioneers are by no means past, and tasks enormous in their magnitude yet call for the initiative and energies of Western people.

It is both natural and inevitable that during these years of pioneer settlement and development the thought and activities of the people should be directed to those material and physical things necessary to the opening of the country and providing for its financial success and prosperity. Problems of transportation by rail and ocean, the construction of roads and bridges, development of markets and access to them for Western products, questions of credits and adequate banking facilities, mortgage loans and rates of interest, and all the other economic problems therefore loom large at present throughout the West, and the very fact that they call for so much consideration, agitation and legislation, has a tendency to create in the minds of people elsewhere a false idea that the people of the West are wholly material, even necessary in their outlook, giving little thought to or having little regard for what are generally termed the finer and better things in life.

The surprising thing about Canada's prairie provinces is not that so much attention is necessarily devoted to the material development and well-being of the country, but that such a large amount of time, earnest thought and hard earned money is so freely given by Western people in these early days of their country's history to what are termed the finer arts, and to the development of a strong, intelligent and cultured citizenship. It is one thing for old established, well settled and wealthy countries to erect and maintain great universities, museums of art, conservatories of music, symphony orchestras, etc., etc., but quite another thing for sparsely settled pioneer communities to do so.

Nevertheless on these prairie provinces greater attention is being paid to the provision of higher institutions of learning than in many old and wealthy countries, and even in these still pioneer days the work of collecting art treasures, establishing museums, and cultivating a popular taste for the best in literature and music is receiving increasing attention and support.

None of the older Canadian provinces are putting forth anything like the same effort in the encouragement of good music among the masses of the population as is carried on four or five years in these prairie provinces through the instrumentality of the annual musical festivals. In the older provinces and in the states to the south, good music is, as a rule, provided through the beneficence of a few wealthy patrons. Here in the West, where people of great wealth are few and far between, those "finer" things can only be made possible through the self-denying service of the people themselves, maintained by the small contributions of all.

These annual musical festivals, which are increasing in popularity and attaining a higher standard of excellence year after year, are but the culmination of faithful, painstaking work on the part of scores of small musical organizations scattered throughout the cities, towns, villages and rural districts of the Canadian West, and all of which are constantly bringing real pleasure and profit to their respective communities. And what is being accomplished in the development of a popular taste for good music is to an increasing degree also being accomplished in the realm of literature and art. The people of the West are not mere money grubbers. They are striving hard to attain to material prosperity. It is true, and they are insistent in their demands that those material things essential to the attainment of that object shall be provided. But such material prosperity is regarded by the vast majority of Western people merely as a means to an end, that end being the enrichment of the whole life of the people and the upbuilding of as fine a country and race of people as are to be found in the world. The fact that so much is now being done to achieve that result when the means for its accomplishment are so limited, speaks volumes for the faith and aspirations of the Western Canadian, and holds promise of a rich and wonderful future.

Belgians Want B.C. Zinc

Faced With Shortage Since Australian Supply Cut Off

J. Nivette, mining engineer for the Vieille-Montagne Zinc Co. of Belgium, is in Vancouver with word that his company is prepared to take an unlimited quantity of zinc concentrates from this province and to finance or operate zinc property in British Columbia.

Mr. Nivette states that a great source of zinc in Australia, from which the concentrates for 20 years was secured, have been lost to Belgium, and that, faced with a growing world demand for the metal, his company is prepared to spend a large amount of money in British Columbia to create here a new supply for its European smelters.

The light in Bishop's lightness, off the southwest coast of England, weighs several tons, but can be revolved by a child because it rests in a circular trough of mercury.

Coal Resources Of West

62 Billion Tons of Coal Lie Under the Soil of Alberta

Sixty-two billion tons of coal, half of this amount recoverable, lie beneath the surface of Alberta soil, according to Prof. J. A. Allen, petroleum geologist and head of the department of geology of the University of Alberta. In a statement made before the Alberta coal commission. The commission was also told that \$12,000,000 had been lost by the abandonment of coal mines during the past 20 years. This loss is ascribed to loss of markets.

You can't always judge things by their looks. Shaving later looks just as good to eat as whipped cream.

When a man is sure that his friends never say unkind things to him he is sure that all his friends are dead.

One song sung amid a storm is of more benefit to mankind than a whole concert when the sun is shining.

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Laxative, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of **W. C. H. H. H. H.** Proven directions on each package. Physicians everywhere recommend it.

"Play Streets"

Where Automobiles Are Banned and Children Can Romp Without Fear of Death

In some cities of the United States the problem of safeguarding the lives of children has been solved by the designation of certain streets as "play streets." During certain hours of the day automobiles are denied access to these designated zones. "The plan, it is said, has proved to be popular with the kiddies, their parents and the motorists themselves."—Hamilton Spectator.

For Aches, Pains, The Safe Home Remedy NERVINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick relief always follows a vigorous rubbing with good old NERVINE. If it's Croup, Colds, Diarrhoea, NERVINE is a wonderful remedy. It brings ease and comfort so quickly. For young and old, overcome the minor ills that constantly arise in the home, nothing compares with "Nervine."—35 cents at all dealers.

Believe In Divining Rod

People In Czechoslovakia Have Had Satisfactory Demonstration

The people of Poodilitz, Czechoslovakia, no longer doubt the efficacy of the divining rod as a means of locating water under the surface of the earth. They have had a demonstration, they aver, which is conclusive.

Badly in need of a water supply three years ago the town employed Heinrich Otto, a local expert with the divining rod, to locate a well. He did so, but a short 20 feet deep gave nothing but dry soil, and the project was abandoned. The town managed to get along until this winter, when existing supplies became so scant that Heinrich again was called in. He walked about with his divining rod, and as he passed over the old well, the story goes, the rod itself was actually pulled out of his hands.

Town workmen went to the bottom of the old shaft, dug down six feet more, and found an abundant supply.

NEW STRENGTH FOR WEAK GIRLS

Can Be Had Through the Rich, Red Blood Made By Dr. Williams' Pink Pills

There comes a time in the life of almost every girl when weakness attacks her. The strain upon her blood supply is too great, and there comes headache and backache, loss of appetite, attacks of dizziness, and, in addition, a constant weariness and a tendency to a decline. All these symptoms may not be present in any particular case, but the occurrence of any one of them shows the necessity for prompt treatment. And the very best treatment is through the blood-making tonic qualities of Dr. Williams' Pink Pills. They are the one thing needed to maintain the health of growing girls and women of mature years.

Here is a bit of strong proof—Miss Martha Hearn, King Highway, Newcastle, N.B., says:—"I was in an extremely run-down and nervous condition. I was losing sleep, had no appetite, always pale, and suffered frequently from headaches. In fact my condition can best be described as miserable. I had tried several treatments but they did not help me in the least. Then, reading one day about Dr. Williams' Pink Pills, I bought a box. After using three boxes I was much improved, but continued until I had taken six boxes, with the result that I am now well and strong, with good color and a hearty appetite. In view of what Dr. Williams' Pink Pills have done for me I cannot recommend them too highly."

You can get these Pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Increased Pensions

Commons Passes a Resolution Amending the Pensions Act

A resolution to provide for amendments to the Pensions Act was introduced in the House by Hon. H. S. E. Bond, minister of soldiers' civil rehabilitation. Among the amendments contemplated are provisions for a definite pension, irreducible for two years in cases of pulmonary tuberculosis; for increased pensions to mothers whose husbands are physically helpless, or in a dependent condition; and for conditional pension which may be continued if dependent parents.

The resolution was carried without further discussion, and a bill based on it was given first reading.

London school children took out more than 2,500,000 books from the city libraries last year, as compared with 714,000 twenty years ago.

Minard's Liniment for Backache

W. N. U. 1576

To Control Trade In Arms

Ethiopia Registers Objection to Any Restriction Being Placed

Any attempt at the coming international conference on the control of the trade in arms and munitions to define extensive zones where the importation of arms is prohibited or greatly restricted, promises to bring a clash with Ethiopia. This country has sent a strong note to the League of Nations upholding her need of arms to protect herself and maintain order and in any case the Ethiopian Government demands the right to air its views before the league council.

Alberta Tar Sands

Company Making Preparations to Start Development Operations. Officials of the Anglo-Canadian Oil Refineries and Refiners, Ltd., a company that was formed some time ago with the object of developing the Northern Alberta tar sands on a commercial scale, state that they are making preparations to start operations this spring. The company is backed by local capital and has acquired the Canadian rights for a German process of extracting the bitumen from the sand.

HEART WAS WEAK NERVES ALL GONE

Mrs. J. H. Hallenbeck, 1175 Weland Avenue, St. Catharines, Ont., writes:—"I was in a gas explosion; it left me with a weak heart, and my nerves were all gone. I suffered everything; couldn't sleep, or endure any excitement, and when left alone I felt as if I could scream. I took dizzy spells, often falling and bruising myself. My mother read about your Milburn's Heart and Nerve Pills, and bought me a box, but having taken so many different kinds of medicine I just seemed that I did not have any confidence in any of them. I took one box of H. & N. Pills, and felt so much better continuing with them until I had used five boxes, and after I had taken them I did not need any more. I cannot praise, or recommend, Milburn's Heart and Nerve Pills too highly after all they have done for me."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Ignorance and Communism

School Laws of This Country Must Be Obeyed by All Classes

The British Columbia Government is not letting up in its campaign with the Doukhobors. This is the land of the free, and no country interferes less with the private life of the people, but there are some things that every Canadian Government must do, and one of these is to enforce the school law. The one reason that the Doukhobors object to obeying that law is because he finds when the child goes to school and learns something, he ceases to become a Communist.—Calgary Albertan.

Japan's Naval Programme

Has in Hand a Formidable Programme of Naval Construction

Japan is the only power engaged in carrying out her programme of naval construction without variation, and apparently also without delay. She has in hand what, in view of the restraint which is being exercised in other countries, can only be regarded as a formidable programme. She possesses already twenty-eight cruisers, and is building eleven more; she also has in hand two aircraft carriers, twenty-three destroyers, twenty-eight submarines and three mine-sweepers.—London Daily Telegraph.

Extend Auto Permits

Support of all the automobile clubs throughout Canada will be solicited by the Automobile Club of British Columbia in an endeavor to obtain from the customs department an extension of the thirty-day automobile tourist permits, according to an announcement by F. J. Ekins, the club manager.

An Oil that is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead of aught to attest its excellence for use in these countries it is on sale and in demand.

Romance of Provincial History

The children of British Columbia can never be expected to take much interest in the development of this province until their imaginations are fired by the romance of the province's history.—Vancouver Sun.

Juvenile Migration

London Saturday Review Deals With This Important Question

The London Saturday Review, dealing with the subject of child immigration in Canada, says the annual reports of the chief inspector of British immigrants receiving homes show but little initiative and they carefully avoid criticism of the methods followed in connection with child immigration.

"Juvenile migration towards Canada," the Review says, "has too long remained only an adjunct to the work of reclamation of child life in the English and Scottish congested areas. These limitations should be removed and a state-aided state-controlled system, inaugurated that would be available for boys and girls of all classes."

Valuable Emerald Sold Cheap

Supposed To Be Imitation But Found To Be Genuine

Two shillings for an emerald was paid by a man who visited a cheap jewellery store. The stone which was believed to be an imitation turned out to be a genuine gem and sold for \$1,450. A dealer in cheap jewellery in one of the meaner streets of Rochester, learnt that a man in Sheffield had a quantity of imitation stones to sell. The goods included a supposed replica of an emerald ring, which was retailed for two shillings. Later the purchaser had it valued, and it was found that the jewel was one of six carats, set in gold. Efforts to trace the man who sold the ring have proved unsuccessful, and the earlier history of the jewel, which measures half an inch across, is unknown.

He Would Not Be Without Them

Quebec Man Absolutely Relieved Of Backache

Mr. Alfred Gagnon Recommends Dr. Williams' Pink Pills to All Who Suffer

Moulth Jersins, Que.—(Special).—"A few words about your Dr. Williams' Pink Pills. They have done me much good," states Mr. Gagnon, a well known and highly respected resident of the place. "For pains in the back and kidneys, I have taken Dr. Williams' Pink Pills. They have done me much good. I always keep a box in the house. To day, thanks to your pills I am quite relieved of my trouble and recommend them to all who suffer. Kindly send me one of your albums."

Dr. Williams' Pink Pills are purely and simply a kidney remedy. They act directly on the kidneys, strengthening them and putting them in condition to do their full work of straining the impurities out of the blood. Dr. Williams' Pink Pills have been in use in Canada for more than thirty years. They demonstrated their worth in the most serious forms of kidney disease, such as rheumatism, dropsy, diabetes, neuritis and catarrh.

New Scholarship Given

Donated by the International Federation of the Students of the League of Nations, a new scholarship is being offered students at the University of Saskatchewan, according to an announcement by Prof. Frank Underwood, of the history department at the varsity. This means that some student will leave early next fall to attend the sessions of the council of the League of Nations at Geneva.

Easterner Builds Fine Yacht

What will be the finest and most costly private ocean-going yacht built in Eastern Canada by order of Commander J. K. E. Ross, is now nearing completion at Orillia. Her cost is placed at \$100,000. The "Canadian" as she is to be named, will be electrically lighted and heated, will have a speed of about twelve knots, carry a crew of six and have sleeping accommodation for twelve.

The fair sex is decidedly in the majority in Vancouver, according to a census taken by the city authorities on January 1, 1925. The figures are 1,966,290 women and 962,628 men.

And maybe the early bird doesn't enjoy the worm as much as the late bird enjoys the sleep.

E. F. Haddon, inventor of the gas mask, entered the French army as a private.

Would Provide New Industry

Alberta Seeks to Have Straw Paper Manufacture

Efforts which have extended over the past three years to demonstrate the practicability of Alberta straw for the manufacture of papers of different kinds, are nearing complete success, according to Trade Commissioner Howard Stutchbury. Arrangements are now being made to have an expert and paper engineer visit the province in the near future and make an examination of the local conditions.

It is estimated that a plant turning out the coarser products to the amount of twenty-five tons a day will cost in the vicinity of \$200,000, and it is hoped to interest capital in this project during the coming summer.

Free Grant Homesteads

440 Homesteads Taken Up In First Two Months of This Year

During January and February this year 440 free grant homesteads were taken up in Manitoba, Saskatchewan and Alberta and British Columbia, a few less than the record for the same period last year. The official report shows that 217 were taken up in Saskatchewan and 210 in Alberta. In the same period \$7 soldier grants were taken up. These, with the homesteads, represent approximately \$1,229 acres.

Requisite on the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

Ship Live Poultry To Holland. Large shipments of white Wyandottes from the farm of Hon. John Martin, Ontario minister of agriculture, have gone forward to Holland. One of the lot of 50 birds is consigned to the Dutch Government. The whole shipment is said to be the largest lot of pure-bred poultry ever shipped from Canada.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that has given relief, those who for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost everywhere.

Trans-Canada Highway. Virtual completion of the trans-Canada highway through Manitoba by October 1 is the aim of the good roads department of the Provincial Government. The work, when finished, will complete the road from Brandon west to the Saskatchewan boundary.

Widows of former U.S. presidents get a pension of \$5,000 a year and a franking privilege.

Chief of Royal Air Force Would Abolish Aeroplanes As a Menace to Civilization

Aeroplanes should be abolished because they are a menace to civilization, according to Sir Hugh Trenchard, chief of staff of the Royal Air Force in Britain.

Sir Hugh, one of the eminent British aviation authorities, brought his audience up with a jerk when he condemned the weapon he commands in a speech in London.

"All the good aeroplanes can do in civil life," Sir Hugh said, "cannot balance the harm they may do in war. If I had the casting vote I would say that aeroplanes are an infinitely more harmful weapon than any other and terribly powerful. The aeroplane is the best offensive ever invented.

"It is a bad weapon for defence, but it is the only means of defence against other aeroplanes, and I doubt whether any one weapon will take its place within this century.

"Nearly all naval battles 250 years ago were fought within one mile of shore. An aeroplane may not sink ships 250 miles from shore, but it can damage them and prevent bombardment of shore positions. Within an hour 50 or 100 years the air will be the only practical efficient means of defending the empire."

Immigration to Canada

Considerable Activity in Immigration This Year Is Indicated

In March of this year immigration to Canada totalled 5,575 compared with 2,210 in February, an increase of 1,365. Of the 5,575 an official statement issued by the department of immigration and colonization shows that 2,273 were British, 1,297 from the United States and 2,005 from other countries. In the same month 2,721 Canadians, who had been in the United States six months or longer, returned to the Dominion.

For the fiscal year 1924-25 ended March 31st last, the total immigration was 111,862 made up of 53,178 from the British Isles, 35,818 from the United States and 22,866 from other countries. In the same period 43,775 Canadians returned from the United States so that if this number be added to the general immigration total of 111,862 the combined count is 155,137. Indication affords that there will be considerable activity in immigration during the next few months.

Empire Settlement Act

Provisions Made For Three Thousand Selected Immigrant Families

Regulations for the settlement of the three thousand selected immigrant families who are being brought to Canada under the Empire Settlement Act, have been made public. They provide for the setting aside of land for the new settlers, the allocation of the lands to the immigrants at a price to be fixed by the independent advisory committee for the district in which the farms are situated, that all buildings on land for soldier settlers shall be placed in good repair, and that the total advances of all descriptions to any immigrants, including the value of the land and the British advances, shall not exceed \$7,500 in the case of any one settler.

Tree Planting

Farmers Can Make No Better Investment Than Setting Out Trees

Trees are not only things of beauty. They are things of comfort, as well. They afford protection from the sun in summer and the winds and snow in winter. They conserve moisture and attract birds, which in turn maintain the balance of nature by destroying pernicious insects. Saskatchewan has made a good beginning in tree planting, but it is only a beginning. This spring, and every succeeding spring, should see more and more trees set out on farms and in the cities, towns and villages until the saturation point has been reached.—Regina Leader.

Salt Production in Canada

Salt production in Canada during 1924 amounted to 210,737 tons, of which quantity 207,919 tons worth \$1,374,780 was marketed, according to a report issued by the bureau of statistics. Plants operating in the country contributed 97 per cent. of the total production, the balance, or 453 tons, was made up of shipments from the Malagash mine in Nova Scotia.

New Bird Sanctuaries

Eleven new bird sanctuaries have been established in Saskatchewan by the federal parks branch. These sanctuaries are established for the protection of game birds during the breeding season.

What's Doing in Saskatchewan?

(Continued from Last Week)

By Walter P. Davidson, Author of "The New People"

For a decade prior to the change-over to more intensive cultivation, crop rotation and, numerically, marketing and orderly methods of marketing, the farmers proved themselves as human as the rest of us, by indulging in extensive fencing. To-day, trust and mortgage companies own a day-by-day relationship with 85 per cent of Saskatchewan farmers. The liquid or frozen status of those loans has been subject to the three usual factors: The energy and ability of the borrower; crop conditions in his district; and the basis of valuation. The latter two considerations have played a conspicuous part in making necessary the creation of "The Debt Adjustment Bureau" in this province; legislative authority saying, in effect, to mortgage and mortgages: "Come, let us reason together." It is only fair to add that all the errors of judgment have not been on the side of the borrower or the lender.

Mistaking a Car of Wheat! Bearing witness to flagrantly easy conditions of credit, I will resurrect two memories of a financial day that is past.

It was in 1910, not in what is known as "the Goose Lake country," and that spring the steel had just arrived at the western border of Saskatchewan, where the 400-mile stretch of line between Saskatchewan and Calgary. These were the days of the "hot" wheat mining. I knew a man who shipped out three cars of wheat that day. Things looked rosy. Friend Farmer took a trip to see the "hot" Eastern Ontario, and doubtless gave them the details of the fertility in the far west. He returned in the spring, with a carload of dairy cattle, enthusiasm and additional funds. With the exception of an intervening dry season, the production record of wheat shipments in rising numbers each fall—cars, 5 cars, 7 cars; and finally, a carload of dairy cattle, and the high record of 16 carloads of the golden grain. Then something seemed to happen in the district. There were three meagre crops in this succession, and one disastrous dry season. Four straight non-crops followed, and the easy money abruptly changed. Our friend found himself in possession of 16 carloads of dairy cattle, and a half paid for farms. His banker grew more intimate but less cordial. His holdings had to be operated, and there were men to pay, whether the money came or not. The thing settled down to a narration between creditors and a farmer, and the thing of life of taxes. At the end it became a question of saving what was left of the money. It was discovered (by Mr. Farmer) that an elevator recently carrying an entire carload of wheat from the "big crop" had been hidden away carefully in a bedroom of a house, and never missed. "At least," said "clear." Those folks are in a California city today. Occasionally, I am sure, some kind of a "well-known" sum must at their disposal. "I stand in a land of roses, but I dream of a land of snow."

Fish From Prairies

Value of Product of Three Prairie Provinces Reaches High Figure

The product of the commercial fisheries in the three prairie provinces to 1924 had a total market value of \$2,064,162, apportioned as follows: Manitoba, \$323,563; Saskatchewan, \$1,482,482; and Alberta, \$238,117.

Compared with the preceding year the value of Manitoba's fishery product increased by \$211,568, or 21 per cent; and of Saskatchewan's by \$195,849, or 68 per cent. The value of Alberta's product decreased by \$99,630, or 23 per cent.

The value of the fishery production of the Yukon Territory in 1924 was \$18,773.

In Manitoba the principal kinds of fish, in order of value, were pickerel, whitefish, sturgeon and pike. In Saskatchewan and Alberta, whitefish is of first importance, the value of this fish in the former province representing 75 per cent. of the total value of the fishery production of the province, and in the latter province 71 per cent. For the three provinces as a whole, whitefish represents 42 per cent. of the total value of the fishery production and pickerel 28 per cent.

Pigs Sensitive To Sudden Sunlight

Must Get Acquainted Gradually To Extremes of Light and Heat

Pigs require a range on the ground. Any breeder of hogs will tell you that, but while hogs require range they must be familiarized very gradually with the light and sun. Contrary to our idea generally the hog is a delicate animal under certain conditions, and one thing that will hurry his passage by the unprofitable route to the happy hunting grounds is a sudden change from a cool, dark pen to brilliant, scorching sunlight. While, therefore, the hogs should be let to the ground, a good deal of judgment must be used in keeping the pig out of the sun from the extremes of light and heat, till there has been a gradual acclimating thereto. Even when this has been done, in a field where there are no shade trees, shelter should be provided into which the hogs may go for sleep or rest.

Big Colonization Scheme

Purchase 260,000 Acres of Land in Central and Northern Alberta

Acquiring the tract of 260,000 acres of land holdings of the Western Canadian Land Company, originally purchased from the Canadian Pacific Railway, the British Land Settlement Corporation plans a great colonization scheme for Central and Northern Alberta. The lands in question stretch across the province north of Edmonton from the district north of Vermilion to Wabamun. It is intended to bring out groups of immigrants who will receive financial assistance.

Romance Passing

Historical Spots Are Invaded By Modern Appliances

Modern science is taking the romance out of the region "where the River Shannon flows." A huge hydro-electric development project has been started on the river. Other romantic and historic spots are being stamped with "the progress of science." Gasoline motor cars now churn up the mud on the road to Mandalay; a railroad runs through the famous Nottingham forest, and a large dam is being built on the Jordan River in Palestine. Chicago Evening Post.

Encourage Sugar Beet Growers

Sugar beet growers in Southern Alberta will be backed financially to the extent of \$25 an acre by the Co-operative Credit Society of Alberta, according to an announcement by W. H. Carvell, inspector of the credit societies. The beets will be grown for the new \$15,000 sugar refinery now being erected at Raymond.

An Honest Taxi Driver

A dishonest taxi driver turned over to the police a brief case containing 200,000 francs in bank notes and bearer bonds which had been left in his cab. He refused to give his name, answering, "I only did what any honest man would do and would not dream of taking a reward."

Treat For London Children

Twenty thousand London school children are to be taken to theaters to see Shakespearean plays during the year. The cost, \$6,000, will be borne by the London County Council.

The trouble with holding your head too high is that you do not see the mud puddles.

Progressive Work Accomplished In Canada In Respect To Assisting Indian Population

(Continued from Last Week)

By Walter P. Davidson, Author of "The New People"

The three premier ports on the Pacific coast during 1924—Los Angeles, 2,212,000 tons; San Francisco, 2,738,430 tons; Vancouver, 2,440,652 tons. Yet Saskatchewan business minds agree that a way must be found to "fish" some of this vast raw material tonnage into a higher product. To-day, however, as a result of Saskatchewan's distance from the water, and a somewhat unfavorable position in the freight rate structure of the Dominion, her people are commencing to think in industrial terms. They are beginning to wonder just what they should do to balance their enormous grain production with a group of the greatest mills in North America. For this is not an unreasonable desire, in a province that can furnish the motive brick to build those mills, and to operate them, and the grain to feed them? Today there are 54 mills of various sizes in Saskatchewan. They are capitalized at four million dollars, and employ 654 people. The 1924 production of Saskatchewan mills totalled \$12,000,000 in all grains, and the value of the year's factory output in the province. Undoubtedly, the next phase in the development of Saskatchewan is economic vitality in Saskatchewan will be the growth of her "infant industries"—urban echoes of her vast agricultural activities.

More People! Saskatchewan's central need is merely an aggravated form of the need to develop her own people. It takes people to make a nation, and just as health is the first necessity of the individual, so the first wealth of a country is not its broad acres, nor its forests, nor its minerals. It takes people to make a nation, and just as health is the first necessity of the individual, so the first wealth of a country is not its broad acres, nor its forests, nor its minerals.

Saskatchewan today has the population of the city of Montreal, thirty-two miles in diameter, and 1,000 square miles. Think it over, and you will understand why the giant key-note of the province is to be a hungry for more people. Remember, too, that there are a further 150,000 square miles in the unsettled and unreserved section of Saskatchewan to the north, imagine spreading Montreal's population over the empire that men call "Saskatchewan."

Today there are 6,450 miles of railway lines within the province. The population density is 125 people per square mile. In England, too, the population density is 125 people per square mile. In the vicinity of 1,000 people along her lines. Her railways are not only a source of employment, yet you could empty that "light littleisle" five times over into this mighty province!

One hundred and twenty-five of the number came direct from Edmonton spring show where they had captured the first five prizes in the carload class. Others included in the lot were the grand champion steer formerly owned by the University of Alberta and five Hereford steers that took first place at Regina, Calgary and Saskatoon shows.

The lot was consigned to Mr. J. T. Irwin, Glasgow, under whose name a number of them will be shown at some of the leading shows of that country as an example of Western Canadian beef.

Raising the Guarantee

Backing the National Railways Against Loss On Hauling Coal to the East

The Dominion Government is to back the National Railways against loss in hauling Alberta's trial shipment of coal to Ontario to the extent of 75 cents per ton, instead of 60 cents as formerly arranged. It is to be supposed that the amount of the guarantee was raised at request of the railway management, and because of a suspicion that 60 cents per ton would not cover the loss. If that is somewhat discouraging as to the prospect of shipping coal in the ordinary way to Ontario at the rate of \$7.00 per ton it is equally assuring that the government is willing to make the conditions as favorable to the success of the experiment as can be done.—Edmonton Bulletin.

Edison Came to Rescue

If in your travels you find a blue heron, an unusually small bird, don't believe that you have discovered a new species. It is probably the bird that Thomas A. Edison fixed at Fort Myers, Fla. He came across a blue heron with a mutilated upper bill, which made it almost impossible for the bird to obtain its food. Upon the suggestion of Mr. Edison, the bird was captured and its lower bill trimmed to match the upper. When last seen the bird was contentedly standing in water catching fish.

Western Canada's Wool Clip

Western Canada's wool clip last year had a total value of \$631,700, according to the latest government returns. This year was realized for 2,690,000 pounds of wool.

Only One Is a Pearl mentioned in the Old Testament

It is what you do over and above duty that tells what you are.

Coarse Grain Pool

Preparing For Intensive Campaign to Launch Project in Saskatchewan

Preparations are being made by the Saskatchewan wheat pool starting an intensive campaign throughout the province as soon as seeding has finished to secure signatures to coarse grain pool contracts and increase the acreage under contract to the wheat pool.

Before the coarse grain pool will operate, 33.33 per cent. of the acreage sown to oats and barley this year and 50 per cent. of the acreage sown to flax and rye will have to be signed up. If these minimum acreages have been signed up by Aug. 1st the pool will notify the growers on or before Aug. 23 and the contract signers will be free to withdraw from their agreements by giving notice in writing to the pool any time before Sept. 12. Such notice will automatically cancel the contract.

Pool officials say there is a general doubt throughout the province for a coarse grain pool and with the pool looking to sign-up campaign all over the province no difficulty in acquiring the required acreages is anticipated. The pool will notify contract signers through the press of the date set for the coarse grain pool starting to operate, up to that time growers will be free to sell their grain providing they make actual delivery.

Each contract signer in the coarse grain pool is required to be a member of the wheat pool.

Prize Cattle From West

Fine Consignment Shipped By Alberta Livestock Association

The first consignment of export cattle for 1925 left Montreal recently. It was in all probability the finest that ever left the shores of the Dominion. Consisting of two hundred and seven head shipped by the Livestock Producers' Association of Alberta (the president of which is H. P. Kammer) and averaging around twelve hundred pounds in weight at three years of age, they made an imposing spectacle when viewed on the Montreal East End tracks where they were held for twenty-four hours following their long journey.

One hundred and twenty-five of the number came direct from Edmonton spring show where they had captured the first five prizes in the carload class. Others included in the lot were the grand champion steer formerly owned by the University of Alberta and five Hereford steers that took first place at Regina, Calgary and Saskatoon shows.

The lot was consigned to Mr. J. T. Irwin, Glasgow, under whose name a number of them will be shown at some of the leading shows of that country as an example of Western Canadian beef.

Our Forest Production

Billions of Shingles and Lath Is One Item Only

Recently a great amount of newspaper space has been given to the holding up of a lumber cargo at Boston under a customs regulation requiring that each individual piece should be marked with the name of the owner of origin. It was looked upon as almost a hopeless task, as there were said to be five million pieces of shingles and lath in the cargo. Five million lath and shingles do look like a lot, until they are compared with Canada's yearly output, and then this shingle represents less than one-seventh hundredth part of the annual output. In 1923 there were 2,696,970 shingles and 1,024,320,000 lath cut from Canada's forests. Lath deals in big figures where its forest industry is concerned, but forest fires are threatening this valuable natural resource.

To Protect Livestock

Committee Is Selected To Probe Tuberculosis In Animals

Dr. H. M. Torrey, as chairman of the Dominion scientific research council, announces the selection of the committee that is to make a Canada-wide investigation of the tuberculosis question in its effects on animals. This committee will be under the joint chairmanship of Dr. Torrey, representing the research council, and Dr. J. H. Grisdale, deputy minister of agriculture, Ottawa, and the first meeting, for organization purposes, is to be held in Ottawa at an early date.

Higher Than Eiffel Tower

Two broadcasting towers are now under construction in Germany that will exceed in height all others in the country. Both will be provided with elevators, and will be used as observation towers as well. One, to be built in a suburb of Berlin, will be 1,919 feet, topping the Eiffel Tower at 1,013 feet.

An auto off gauge which lights a small light on the dashboard when the oil supply becomes low is a recent invention.

Sharper than the tooth of a serpent is the sarcasm of one who has no sympathy with human vanity.

Mix Mustard this way

Mix Keen's Mustard with water to the consistency of a thick paste. Add water until the desired thickness is obtained. If milder flavor is desired mix with milk. Mix mustard freshly for every meal.

but it must be Keen's

"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

CHAPTER XIX.—Continued.

"Things had not sped at all with him in the past fortnight, since his acceptance of the king's commission. There had been trouble with Bishop from the moment of landing. As Blood and Lord Julian had stepped ashore together they had been met by Colonel Bishop, who took no pains to dissemble his chagrin at the turn of events and his determination to change it.

Blood's thoughts were upon this and other things as he lounged there on the day-bed. He had been a fortnight in Port Royal, his ship virtually a unit now in the Jamaica squadron. And when the news of it reached Tortuga and the buccanniers who awaited his return, the name of Captain Blood, which had stood so high among the brethren of the Coast, would become a byword. And for what had he placed himself in this position? For the sake of a girl who avoided him so persistently and intentionally that he must assume that she still regarded him with aversion. Nor was that the worst of it. He was allowed plainly to perceive that it was the graceful, elegant young sister from St. James's, Lord Julian Wade, to whom her every moment was devoted. What chance had he, a desperate adventurer with a record of outlawry, against such a rival as that? A man of parts, moreover, as he was bound to admit!

A bout that had approached unnoticed from the shore came scrapping and bawling against the great red hull of the Armada. Captain Blood rose, tall, alert and arresting by elegant in a scarlet, gold-laced coat that advertised his new position.

"A note for you from the Deputy-Governor," said Jeremy Pitt shortly, as he proffered a folded sheet.

Blood broke the seal and read. "It is a very personal story, my friend," said, and passed the note to his friend.

"The young master's grey eyes shined like—" "You'll not go?" he said, between question and assertion. Why did you let Wolvestone and the others go?" he cried, with a touch of bitterness. "You should have seen the danger."

"How could I be honestly held to detain them?" It was in the bargain. Besides, how could their staying have helped me?" And as Pitt did not answer him: "You see?" he said, and shrugged. "I'll be getting my hat and cane and sword, and go ashore in."

HER NERVES BETTER NOW

Received Much Benefit by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ontario.—"I started to get weak after my second child was born, and kept on getting worse until I could not do my own housework and was so bad with my nerves that I was afraid to stay alone at any time. I had a girl waiting for me a whole year before I was able to do my own housework again. Through a friend I learned of Lydia E. Pinkham's Vegetable Compound and took four bottles of it. I gave birth to a baby boy the 4th day of September, 1922. I am still doing my own work and washing. Of course, I don't feel well every day because I don't get my rest as the baby is so cross. But when I get my rest I feel fine. I am still taking the Vegetable Compound and am going to keep on with it until cured. My nerves are much better since taking it. I can stay alone day or night and not be the least frightened. You can use this letter as a testimonial and I will answer letters from women asking about the Vegetable Compound."

Mrs. CHARLES CARSON, 27 Forsythe Street, Chatham, Ontario.
Mrs. Carson is willing to write to any girl or woman suffering from female troubles.

W. N. E. 1574

the cockpit. See it manned for me!" "You're to deliver yourself into Bishop's hands," Pitt warned him.

Blood knew as well as Pitt that in going ashore that morning he carried his life in his hands. Walking leisurely, he skirted the embattled wall and passed through the great gates into the courtyard. On his right stretched a spacious garden, beyond which rose the white houses that were the residence of the Deputy-Governor. In that garden's main avenue, that was fringed with palm and sandalwood, he had caught sight of Miss Bishop alone. He crossed the courtyard with suddenly lengthened stride.

"Good morning to you, my dear," was his greeting, as he overtook her; and, but in hand now, he added on a note of protest: "Sure, it's nothing less than unbearable to make me run in this heat."

"I beg that you will let me pass."

"Why do you run, then?" she asked him coolly, standing still and straight before him, all in white and very majestically save in her unusual composure. "I am pressed," she informed him. "So you will forgive me if I do not stay."

"You were none so pressed until I came."

"Since you perceive it, sir, I wonder that you trouble to be so insistent."

That crossed the words between them, and it was against Blood's instincts to avoid an engagement.

"Fudge, you explain yourself after a fashion," said he. "But, since it was more or less in your service that I donned the King's coat, you should suffer it to cover the thief and pirate."

She shrugged and turned back, in some resentment and some regret. Peering to betray the latter, she took refuge in the former. "I do my best," said she.

"So that you can be charitable in some ways?" He laughed softly. "Glorious, now, I should be thankful for so much. Maybe I'm presumptuous. But I can't forget that when I was no better than a slave in your uncle's household in Barbados, you used me with a certain kindness."

"Why not?" In those days you had some claim upon my kindness. You were just an unfortunate gentleman then."

"And what else would you be calling me now?"

"Hardly unfortunate. We've heard of your good fortune on the seas; how your luck has passed into a byword. And we have heard other things; of your good fortune in other directions."

She spoke hastily, the thought of Malmesville d'Ogmore in her mind. And instantly would have recalled the words had she been able. "But Peter Blood owed them lightly ashore, residing into it in none of her meaning, as she feared he would."

"Aye, a deal of lies, devil a doubt, as I could prove to you."

"I cannot think why you should trouble to put yourself on your defense," she discouraged him.

"So that you may think less badly of me than you do."

"What I think of you can be a very little matter to you, sir."

"Can you say that now?" Can you say that, beholding me in this library of a service I despise? Didn't you tell me that I might redeem the past? It's little enough I am concerned to redeem the past save only in your eyes. In my own I see doing nothing at all that I am ashamed of considering the provocation I received."

"I—I can't think why you should speak to me like this," she said, with less than her earlier assurance.

"Ah, now, can't you, indeed?" he cried. "Sure, then, I'll be telling you."

"Oh, please!" There was real alarm in her voice. "I realize fully what you did, and I realize that partly, at least, you may have been urged by consideration for myself. Believe me, I am very grateful. I shall always be grateful."

"But if it's also your intention always to think of me as a thief and a pirate, faith, you may keep your gratitude for all the good it's fit to do me."

A livelier color crept into her cheeks. But, if she resented his tone and his words, she stifled her resentment. She realized that perhaps she had herself provoked his anger. She honestly desired to make amends.

"You are mistaken," she began. "I—I don't think that."

"What is it, then?" quoth he, and added the question: "Lord Julian? Oh, be frank with me," he urged her, unpardonably. "I'll will be a kindness, so it will."

"You—you are quite insufferable," she said. "I beg that you will let me pass."

"I'm not detaining you any longer, my dear. After all, the cursed thing I did for nothing can be undone. You'll remember afterwards that it was your hardness drove me."

"You take that tone!" She dare to take that tone! she cried, astounding him by her sudden vehemence. "You have the effrontery to upbraid me because I will not take your hands when I know how they are stained; when I know you for a murderer and worse?"

"A murderer—?!" he said at last. "Must I name your victims? Did you not murder Levasseur?"

"Levasseur?" He smiled a little. "So they told you about that?"

"Do you deny it?"

"I killed him, it is true. I can remember killing another man in circumstances that were very singular. That was in Bridge-town on the night of the Spanish raid. Mary Trill would tell you of it. She was present."

He clapped his hat on his head with a casual abruptness, and strode away, before she could answer or even grasp the full significance of what he had said.

(To be continued)

Use Oil On Stormy Sea

Very Little Will Surround Vessel With Comparatively Still Waters

It is surprising to learn how very little oil is required to smooth tossing ocean billows and ensure the safety of a mighty vessel. The British admiralty issues instructions as to the application of oil in storms, and points out that a very small quantity is effective in modifying the action of waves and breaking seas. A vessel going at ten knots an hour during a storm can surround itself by comparatively still waters, covered with an oily film, extending a safe distance on all sides, by allowing oil to drip on the water at the rate of little more than a pint an hour. And the effect is greatest on waves in deep water.

Picture May Be Worth Million

Work of Old Master Bought in Junk Shop for \$7.00

The picture owned by Mrs. Stuart Livingston, Vancouver, showing a contending in drinking pose, which she turned over some months ago to Sir Norfarina, an authority on the work of the old masters, for inspection, has been pronounced by him to be a genuine Velasquez and worth perhaps a million dollars.

The picture was bought in a Whitman junk shop 40 years ago for \$7.

Average Family Of Five

Who is it that "average family of five" that the labor department work on? But then, if every family of five were satisfied to live on \$21 a week—they call that the "poverty line"—the driving ambition that shakes great men and millionaires would die out and the world would be a drab place.—Ottawa Journal.

Amend Canned Foods Act

First reading was given to a bill amending the Meat and Canned Foods Act by altering regulations so that meat and canned foods—exclusive of salmon—will be sold by weight instead of by cubic content, in the House of Commons.

Something New!

CHEWERS always prefer their tobacco in perfect condition; this is assured, when they demand it packed in the famous Vacuum (air-tight) tins.

The following well known brands are now packed in the famous Vacuum (air-tight) tins.

- Big Ben Black Plug Chewing Tobacco
- Stag Bright Plug Chewing Tobacco
- Pay Roll Bright Plug Chewing Tobacco
- Piper Heidsieck Bright Plug Chewing Tobacco

Always ask for the Famous Vacuum (Air-Tight) Tin

Trinidad's Lake Of Asphalt

Removal of Four Million Tons Has Not Decreased Supply

The lake of asphalt in Trinidad has fallen only fifteen feet since its discovery by early explorers, despite the fact that approximately 4,000,000 tons of road-making material have been removed. It is estimated that 10,000,000 tons of the mixture have been churned into asphalt by gases during the ages in Pitch Lake, which is known as Devil's Chalk among the natives. To transport the material, rails mounted on ties have been extended over the surface, and cars are run out to the diggers who never move the scene of operations, as each morning digs the holes left by the previous day's activity filled up. About every three days, the pitch covers the road, which slowly sinks into the soft material and must be raised and rebuilt. By means of this track 100,000 tons of asphalt are withdrawn from the lake each year. The entire deposit covers an area of about 110 acres, but its depth has never been measured.—Popular Mechanics.

Cancer Not Hereditary

The idea that cancer is hereditary or even infectious is being given up, according to Basil Hall, noted surgeon of Bradford, England, who addressed the Ontario Medical Association in Toronto. Dr. Hall stated that the theory now entertained was that cancer was caused by a parasite. Cancers, rais and mice are under suspicion as carriers of the parasite, he said.

Conquers Bad Breath and is Popular Again

"The day I started taking Carter's Little Liver Pills," says Mr. John A. Perry of New York City, "my habit of bad breath and bad stomach stopped. I strongly recommend them to all those afflicted with these nasty troubles. I assure you that my own case was a bad one, causing me untold embarrassment, and Carter's helped me right from the start."

Bad breath comes from sour stomach and can usually be relieved quickly by Carter's Little Liver Pills. They are wonderful for constipation, sick-headache and indigestion and they fix the system in a mild and gentle manner, no bad after effects. Recommended and for sale by all drug stores.

Preferred To Remain Unknown

New York Man Educated Hofmann Shunned Publicity

Josef Hofmann now reveals who put up the money for his musical education. It was the late Alfred Corning Clark, a wealthy New Yorker of a bygone generation. In 1888, when young Josef had been exploited to the limit as a ten-year-old prodigy, to the great detriment of his health and art, the Society for the Prevention of Cruelty to Children stepped in and put an end to his appearances. Mr. Clark then came forward and gave \$50,000 that he might study with Anton Rubinstein. He asked nothing for himself and stipulated that his name be withheld. Hofmann saw him only twice, once in Berlin and once in England. Accustomed as we are to philanthropy, which has an eye cocked at the newspapers, this seems especially nice.—New York World.

Occupation An Aid To Health

Lord Nelson Had a Plan That Produced Good Results

On an occasion when Nelson had a big fleet at sea for two months at a time he records that in that period no death from sickness occurred among the 7,000 to 8,000 persons in the fleet. He attributed these remarkable results not merely to the physical surroundings of the fleet, but also to the constant mental stimulus which he aroused by providing the seamen with occupation and frequent amusements. These helped to keep the various faculties in continual play and avoided the monotony which most saps health through its deadening effects on the mind and spirits.—Mahan's Life of Nelson.

Measure Magnetism Of Eye

Dr. Russ, after a series of experiments, states that the human eye emits a magnetic ray that can move a sensitive electrical instrument at a considerable distance. This movement, which is almost instantaneous, may amount to thirty degrees of the compass.

The human body, states Dr. Russ, is not magnetic, but an electrical force is apparently generated in the brain, and escapes through the eyes during sight.

Liquor Manufacture In Canada

Canada's output of hard liquor continues to increase. In the fiscal year 1924, 4,411,896 proof gallons of spirits were actually manufactured in Canadian distilleries, compared with 2,328,879 in 1923.

When an old man proposes to a girl it is up to him to lay his heart at her feet and his cheque-book in his hand.

About all the use some men have for the golden rule is to measure the conduct of others.

Keeping the Peace

Being Prepared to Make War is the Safeguard Against Trouble

The power to hurt an enemy is the best way, human nature being what it is, of keeping at peace. That power we should assume, and should declare ourselves ready to use. It is the paradox of this question that if we are ready to make war in the cause of France, we shall not be required to make it; but if we pursue an anxious isolation in the cause of peace we shall not be allowed to keep it.—London Morning Post.

MAKE CARE OF BABIES EASIER

Stomach disturbances and constipation are responsible for much of the peevishness of babies and young children. When the baby is cross or irritable the mother should not resort to so-called soothing mixtures to correct the trouble for in the majority of cases these mixtures simply drug the child into an unnatural sleep. What is needed is a gentle laxative that will soothe the stomach and regulate the bowels. Such a remedy is found in Baby's Own Tablets. They are easy to take and are guaranteed to be entirely free from opiates and narcotics, concerning them, Mrs. Jos. Townsend, St. Louis, Mo., writes:—"I would like all mothers to know that I feel there is no other medicine to equal Baby's Own Tablets. I always keep a box in the house and their prompt use never fails to restore my little ones to good health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Because he had damaged a borrowed book and had not the money to pay for it, Abraham Lincoln worked for a farmer.

If a man is not great in little things, he lacks the element of true greatness.

The Best Sink Value Ever Offered

Relatively new type of Sink at a remarkably low price. The base is rust-resisting Arco Iron, coated with pure white enamel. Includes drain, overflow, electric ranges, etc. Sold complete with all fittings and instructions.

SMP Enameled Sinks

Price Complete **\$13.00**

SMP Enameled Drain Board—Price \$6.50

Wonderful value. White enameled Arco Iron base. Very strong handsome handy. These new SMP Sinks and Drain Boards are sold by all plumbers and hardware stores, or write direct to:

EDMONTON VANCOUVER CALGARY

MOVE TO OMIT WARSHIPS FROM ARMS CONTROL

Geneva.—Great Britain dropped a bomb on Geneva when she proposed, before the international conference on the control of arms and munitions, that warships be omitted from the category of armaments which will be subject to international control. Japan and Italy supported the British move.

This action on the part of Britain followed a move of another kind, when T. E. Burton, of Ohio, proposed an entirely new clause in the convention whereby international traffic in poison gas for war purposes would be prohibited.

Mr. Burton's resolution was subsequently referred to a committee of technical experts.

Rear-Admiral Aubrey Smith, British delegate, outlined to the conference committee on military and naval armaments why his country favored taking warships out of the list of armaments which, under the draft convention, are subject to a system of license when sold by one to another. He argued that the chief aim of the conference was not to prevent illicit trade in armaments, but to control and, especially, make it public.

He held stress on the fact that the object of the conference was not to reduce armaments but, negatively to throw everything about their sale into the light of publicity. Now nobody, he declared, could conceal the sale of a warship, and hence it seemed unnecessary to keep warships in the category of war material to be supervised.

Japan supported the British view for the same reason, and Italy followed suit. No nation opposed the British suggestion.

Arms Conference Is Facing Difficulties

Practically All Smaller States Condemn Proposed Amendment. Geneva.—France, through her eloquent parliamentarian, Paul Boncour, who presides over the French commission of national defence, has given notification that national security must be the precursor to disarmament. Addressing the international conference on the control of arms and munitions he pleaded for that reign of mutual confidence and spirit of mutual assistance among the nations, which would permit the world to decrease its burden of armaments.

Practically all the smaller states came forward in condemnation of the draft convention now before the delegates. One by one, beginning with Greece, they flayed the document, which is the fruit of two years' labor by experts, as a blow at the minor countries, because in effect it makes them entirely dependent on the great manufacturing countries for those armaments which are vital for the maintenance of their national security.

Both Poland and Rumania called attention to the gravity of the situation arising from the absence of Russia from the present deliberations.

Canadians Among Heirs Seeking Fortune

British Estate Valued at Considerably Over Six Million

Fredericton, N.B.—G. Hyron Crawford, of Minto, and John Haywards, of South Devon, representing forty old Canadian and American heirs to the Crawford estate in the British Isles, valued in 1896 at \$6,000,000, now reputed to be worth much more than that amount, have left for Boston, Mass., where they will consult Col. P. A. Guthrie, who has been engaged as legal representative of the claimants.

Income Taxes in West

Ottawa.—Saskatchewan pays less income tax than those of the other two prairie provinces. In answer to a question in the House of Commons, it was stated that the total amounts collected in federal income tax in the fiscal year just ended were: Manitoba, \$3,477,000; Saskatchewan, \$372,000; Alberta, \$1,362,931.

GOING FISHING?

Take along a bottle of Minard's Wonderful for insect bites. Also gives quick relief for sprains and bruises.

W. N. U. 1576

Governor-General Byng To Make Tour Of West

Ottawa.—His Excellency the Governor-General will leave Ottawa on June 16 for a tour of Western Canada which will last a month. The itinerary will include stops at Winnipeg, Edmonton, Regina, B.C. towns, Hazelton, Prince Rupert, Vancouver, Victoria and Calgary. The trip west will be made by the Canadian National Railways, and the return trip over the lines of the Canadian Pacific Railway.

Death Of Lord Leverhulme

Famous Soap Manufacturer Passes Away At Age Of 74

London.—Viscount Leverhulme, famous soap manufacturer and philanthropist, who has been ill with pneumonia for some days, died on May 7. He was 74 years of age.

Lord Leverhulme's private inclinations, as well as his business responsibilities, constituted him a great traveler. He frequently visited Canada, and when in Toronto in 1919 he took occasion to reiterate his views on the advantages of a six-hour working day as helpful to production. On his return from the United States a year later he declared that if Britain followed the States in going day she could pay her debt to the States in five years.

In his later years, Lord Leverhulme suffered from extreme deafness. He had been a widower for a good many years. His heir, the Hon. William Hume Lever, is acting chairman of the business which his father founded.

Seek Co-operation Of Federal Government

Company Would Erect Pulp and Paper Mill In Manitoba

Ottawa.—Co-operation of the Federal Government to provide sufficient supplies of pulpwood for the enterprise is being sought by the Spanish River Pulp and Paper Company who, in conjunction with J. J. McArthur, have announced their willingness to erect a 200-ton pulp and paper mill in Manitoba. They are willing to pay a price equal to the stumpage of pulpwood to competing mills in Northern and Northwestern Ontario and to have subsequent prices to be fixed by the government.

These concessions are sought, the company claim, only to ensure the getting of a sufficient supply of pulpwood to keep the mill going a number of years. The expenditure on the contemplated mill would be about \$5,000,000 or \$6,000,000.

Saskatchewan Coal Is Shipped To Germany

Briquetting Test To Be Made Under New German System

Regina.—One of the investors most interested in the forthcoming briquetting tests in Germany on Saskatchewan lignite coal, Hugh Stithard, Winnipeg, together with a party of industrial engineers, has left for Germany to witness the tests.

The fifty tons of coal shipped from Blenheim to Rotterdam for the experiments have reached the Dutch port safely, according to a cable received by Thos. M. Molloy, commissioner of the provincial bureau of labor and industries.

The briquetting tests will be conducted under the Thyssen and Stinnes systems.

Daring Parachute Descent

Flight Officer Carter Gives a Demonstration At High River

High River, Alta.—Jumping from a Viper aeroplane at a height of 1,200 feet, Flight Officer Albert Carter made the first demonstration parachute descent at the High River air station. The jump was witnessed by hundreds of people from High River. A fairly strong wind was blowing, but the descent was successful. In every way, Carter went up on the wing of the one-seater machine, which was piloted by Flight Officer Dickson.

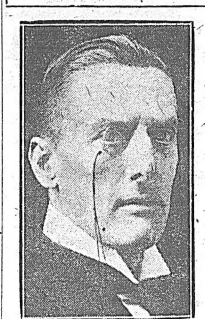

Rhineland Radio Ban

Berlin.—The Reichstag have introduced an interpretation in the Reichstag calling attention to the regulations which still prohibit the use of radio in the Rhineland occupied territory, and asking the government upon what authority "this hostile measure" by the army of occupation is based.

Nevea Scott's Elections

Hallifax, N.S.—The last session of the fourth Nova Scotia Legislature shows Confederation is progressing. This assembly completes the term of the present government, and an election will be held before September 30.

Guarded Against Plotters

AUSTEN CHAMBERLAIN
British Foreign Secretary, who is being closely guarded by plainclothesmen following discovery of a red plot against his life.

Friendly Act Toward Germany

Now Represented On Committee Through Suggestion By France

Geneva.—France made a friendly gesture to Germany at the opening of the session of the conference on the control of traffic in arms, when M. Paul Boncour, announced that the steering committee of the conference be enlarged from seven to nine members, so that all sections of the world might be represented, particularly non-members of the League of Nations. Germany, chiefly as a result of this motion, is now represented on the committee.

C. N. R. MAIN ESTIMATES ARE TO BE REDUCED

Ottawa.—While spiritedly defending the operation of the Canadian National Railways in his annual statement on this phase of the system in the House of Commons, and expressing the view that the showing of the system had, to date, been phenomenal, Hon. George E. Graham, minister of railways, announced reductions in the estimates for the railways, with a view to lightening the financial burden of the country. Ten millions is to be eliminated from the main estimates, and supplementary estimates for the system will not be pressed.

Mr. Graham felt that when all things were considered, the success achieved by the Canadian National was phenomenal. He declared no private company had to struggle under such difficulties as the Canadian National. At one of the most critical periods of the world, the Canadian National had been handed a disjointed mass of industries, the chief enemies of which had been plunged into bankruptcy under private ownership. There seemed to be an idea that public ownership should, at a stroke, remedy all the deficiencies of private ownership, during the last half century.

Transportation companies should be judged by the service rendered, and by the cost. Mr. Graham compared the operation of American and Canadian railways.

"In Canada," he said, "both the great lines of railway are above criticism, and, in fact, one of the great difficulties of both the Canadian Pacific Railway and the Canadian National Railways in this country is that the service in quality exceeds the remuneration in quantity. The service to the Canadian people is altogether too good."

Soldiers' Memorial Arch

Names of Soldiers From Different Parts of Empire to Be Placed on Gates at Ypres

London.—The names of some 50,000 soldiers from all parts of the empire will be inscribed on the Memorial Arch at Menin Gate, Ypres, which is shortly to be erected by the Imperial war graves commission. In connection with the inscribing of the names of the Ypres dead, there will probably be 8,000 Canadian names and the high commissioner for Canada bears the responsibility of the inscription of these names.

Committed For Trial Assassination

Cairo.—The king named accused of the assassination of Sir Lee Stack, Sirdar of the Egyptian army and Governor-General of the Sudan, last November, were committed to trial. When arraigned before the magistrate, Abdou Patih Amari, one of the accused, described how the murder was carried out.

Propose Amendments To Canada Grain Act

Ottawa.—Amendments to the Canada Grain Act will be brought down in the House of Commons shortly. Hon. T. A. Low, minister of trade and commerce, has given notice of a resolution, preliminary to legislation, "to make further provisions in respect to the handling and marketing of grain or incident to the buying, selling or transportation of grain; the grading and weighing of grain; the handling of grain in and out by country elevators; the operation, manufacture and control of terminal, public and private elevators; the storing, cleaning and binning of grain; the mixing of grain, and the disposition of screenings."

Fish Embargo No Relief

Will Not Help Canadian Industry Says T. H. Johnson

Vancouver.—The suggested embargo on American fish would not bring relief to the halibut fish industry in Canada, according to T. H. Johnson, general manager of the Canadian Fish and Cold Storage Company, Prince Rupert.

"We have hopes that the president of the United States will exercise his prerogative and reduce the duty on Canadian fish entering the United States," Mr. Johnson declared, "when the report of the Hopkinson commission appointed by Mr. Coolidge to inquire into the production costs of American and Canadian halibut is made."

"Men actively engaged in the fish industry are confident that the result of this investigation will be a recommendation that the president exercise his prerogative and reduce the duty by one-half."

The order-in-council passed in 1914 permitting United States fish to pass through Canada as bond was a good thing for Canada, in the opinion of Mr. Johnson, as it provided employment for Canadian labor and much freight for the Canadian National Railways.

Railway Co-operation

Pres. Beatty of the C.P.R. Says This Policy Will Not Alone Solve Difficulties

Montreal.—Addressing shareholders of the Canadian Pacific Railway at the annual meeting here, E. W. Beatty, president of the company, declared that although the Canadian Pacific was in favor of a co-operative policy, which would eliminate as far as possible duplicate train service on the lines of that railway system and of the Canadian National Railways, such a policy was not sufficient to constitute a solution of Canada's railway difficulties.

This, he said, was the only proposal that had been discussed between the Canadian Pacific and the Dominion Government and no situation had arisen which would give the shareholders of the company any reason to believe that their interests would be adversely affected in finding a solution to Canada's problems, as regards the Canadian National Railways.

Earthquake Must Have Occurred At Sea

No Report Received of Tremors Recorded at Ottawa

Ottawa.—Somewhere in the world there has been a terrific earthquake, which, if it occurred in an inhabited portion of the globe, must have caused damage akin to that which was experienced in the terrible earthquake in Tokyo.

This is indicated by the earth tremors which were recorded May 5 and 6 at the Dominion Observatory. The earth shocks were of such intensity and of so great a frequency that the officials at the observatory have been unable to determine the distance to the epicenter.

Press dispatches have not carried any news as to the occurrence of an earthquake anywhere, which leads to the belief it may have occurred somewhere at sea.

Appeals To Farmers

Quebec.—An appeal to all French-Canadian farmers, especially the younger element, to remain at home and till the soil instead of going away and attempting to wrest a living from a big city was made by Henri Bourassa, managing editor of Le Devoir, Montreal, in an address here.

Smuggled Into States By Aeroplanes

Montreal.—The United States immigration headquarters here is informed that an aeroplane making frequent trips between Montreal and New York state is the latest means of transport for immigrants evading the United States quota laws.

Amundsen May Not Have Competition

Algarsson Polar Trip Held Up For Lack of Funds

London.—The race to the North Pole between Amundsen and Grettir Algarsson of Vancouver, the more adventurous of which attracted two competitors a few weeks ago, is in danger of being called off. Amundsen seems likely to have the race all to himself.

The construction of the necessary arship has been delayed for some unexplained cause, but at the Liverpool, where Algarsson's craft is to be built, it is said that the Vancouver man will not make the trip this year, the reason assigned being that the necessary financial backing is not forthcoming.

Meanwhile reports from Copenhagen show that Amundsen is all ready to leave and those Canadians on this side who had set their hearts on seeing Algarsson win the honors, are naturally disappointed. Efforts are, however, still being made to ensure that Algarsson will be able to make the attempt.

Favor Rural Credits

Two Senators Advocate the Adoption Of Government System

Ottawa.—Two speakers in the senate advocated the adoption by the government of a system of rural credits as a necessary aid to agriculture in the Dominion. Senator Mitchell believed that the scheme of credits recommended by Dr. Tory, president of the University of Alberta, would be successful in Canada. Senator Belmont said that rural credits was the most important and practical scheme before the senate.

Senator Mitchell also believed it to be the best scheme until the government provided a better system of financing agriculture. If there was a system of rural credits to consolidate the farmers' debts and secure extended terms for repayment, they could remain on the land and redeem their investment, he said, but, if not, thousands would have to leave all and leave Canada. There was no chance of progress in Alberta without aid of this kind.

Considering Trade Treaty With Finland

Question Will Be Submitted to Parliament

Ottawa.—A trade treaty between Canada and Finland shortly will be submitted to parliament. The acting minister of finance, Hon. J. A. Robb, has given notice of his intention of moving the ratification of a convention to extend "most favored nation" treatment to the Finnish Republic. Mr. Robb has given notice of a bill to ratify the trade agreement of July 11, 1921, between Canada and the Netherlands.

ROBERT FORKE REMAINS LEADER OF PROGRESSIVES

Ottawa.—Robert Forke has decided to remain as leader of the Progressive party. J. Fred Johnston has resigned as chief whip, and is replaced by C. W. Stewart, Humboldt.

This was officially announced following a caucus of the Progressive party.

This ends the long series of Progressive deliberations which have been under way, in one form or another, since the vote on the budget. At the first formal caucus, Robert Forke submitted a virtual ultimatum, insisting on changes in the parliamentary organization of the party as conditional on his retention of the party leadership.

J. Fred Johnston, of East Mountain, who is succeeded as chief whip by C. W. Stewart, of Humboldt, was one of the 17 Progressives who voted with the government on the main budget motion.

There was talk after the caucus that some of the 17 may now throw in their lot with the government. A few of the 17 Progressives who voted with the government on the main budget motion, before the caucus, had no intention of any intentions to leave the Progressive party.

Liability For Wife's Acts

London.—Lord Danesfort, famous British lawyer, will move in the house for appointment of a select committee to investigate the necessity of changing the law which makes a husband liable for damages for his wife's misdeeds. The old law, whereby a British wife is regarded as the husband's chattel, has been whittled down, and now, although the husband cannot touch his wife's money, he is responsible for both her debts and torts.

COMPLETION OF H.B. ROAD URGED BY SUPPORTERS

Ottawa.—The development of the Hudson's Bay Railway and its completion were urged before a gathering of members of parliament and others in the railway committee rooms of the House of Commons.

General R. W. Patterson and F. H. Martin, of the On-to-the-Bay Association, were the principal speakers. Patterson stated that there were millions of dollars worth of equipment lying idle during the right of way, and that if only a part of it was utilized, it would pay for the cost of completion of the road. He said that it seemed utterly foolish to abandon the project when only a few miles of the road remained to be completed, and that the people of the west were almost unanimously behind the idea, and that they felt that the future prosperity of Western Canada depended greatly on the north route for the shipment of grain.

General Patterson said that only one million dollars was needed to finish the road, and that a few small expenditures were made on docks at Port Nelson the project would be finally demonstrated as the absolutely feasible undertaking that Western Canada believed it would be.

Mr. Martin spoke along the same lines, and in the course of his talk referred to the statement of Sir Wilfrid Laurier that the price of Canadian unity was the completion of the Hudson's Bay Railway.

Opposes Free Export Of Arms

Latin-American View Given In Speech Before Arms Control Conference

Geneva.—Through the voice of Dr. Gustav Guerrero, of Salvador, noted jurist, who spoke before the international conference on the control of the traffic in arms and munitions, Latin America told the world that arms should henceforth not be exported freely to countries in the throes of a revolution, but only to governments which have been chosen by constitutional means.

This opinion is thought to represent the views of many South and Central American states, and if put into effect implies an important amendment to the draft convention before the conference, which permits the exportation of arms as soon as the manufacturing country had recognized the government of the purchasing country.

Coal Output Decreased

Ottawa.—The output of coal from Canadian mines during February decreased 22 per cent, below the production for the preceding month, says the bureau of statistics, the figures being 1,164,410 tons in February, against 1,488,624 tons in January.

Canoist Reaches Rome

Rome.—George H. C. Smythe, Canadian canoeist, paddling from London to Rome, arrived here May 6, and was greeted by a large and enthusiastic crowd.

A New Dairy Pail at a Popular Price

See the new SMP Dairy Pail next time you are in town. They are made of special quality, high finished tin, have large dairy pail caps, riveted with large rivets, soldered flush, 100% sanitary. Cut out this advertisement. Show it to your regular dealer. He has our authority to give you a special low price on a pair of these fine pails.

The Fight Against Disease

Extinction of Leprosy Is Believed to Be Near Realization

France is seriously and systematically taking up pre-natal care of babies; the cry of the world's leprosy is being answered in a manner that is slowly bringing about the extinction of leprosy; bureaux of venereal diseases have been established in every state and large city in the United States; the travelling cinema van has done marvels in health propaganda in Bernadette; these and many other items in the present internationally elevated campaign for world health are presented in the current issue of "World Health," the monthly review of the League of Red Cross Societies.

The article on pre-natal care, contributed by Prof. A. Couvreur, is a striking one. Special emphasis is laid upon the social as well as medical protection of the expectant mother. The work among leprosy is described in an article contributed from the Mission to Leprosy, 22, Henrietta Street, London, under whose auspices the work of improving the condition of the leprosy has been going on for fifty years. At a conference of leprosy specialists held at Calcutta, in 1920, by the mission, the medical sub-committee found: 1. That leprosy was only very slowly contagious; 2. That the disease was not directly hereditary; and that children of leprosy parents could be saved if segregated early.

William F. Snow, M.D., general director of the American Social Hygiene Association, writes of the eight main measures taken in the big campaign to combat venereal diseases in the United States. The emphasis is laid upon education rather than repressive action. The article by Dr. D. M. Conner, health officer for the Borough of Bernadette, is illustrated by photographs of plaques used and of the church van.

Sea Encroaching On Shores Of Heligoland

Coast of Little Island Is Being Rapidly Claimed

The shores of the island of Heligoland are caving in with startling rapidity. For years the sea has been steadily encroaching on this little island, and all that was left of the bathing beach has been almost completely claimed by the sea as its own. Recently, a huge slide of approximately 5,000 cubic yards plunged into the sea with a terrific roar.

The villa of a prominent Berlin banker, just completed, is now seriously imperilled, while an adjoining building is being torn down. A solitary garden pavilion hangs on the verge of the precipice as though at any moment it might drop into the depths below.

As the crevices of the waves have of late produced a number of deep crevices in the rocks, it has been found necessary to close the public road over the cliffs.

Of Honorable Lineage

Life of Horse Is Saved on Account of Unusual Circumstances

Riley county (Kansas) is boasting of a horse that is otherwise membership in the Sons of the American Revolution. The animal's proud lineage recently saved its life in the veterinary hospital of the Kansas State Agricultural College at Manhattan. The horse was brought to the hospital with an incurable foot and lameness, and veterinarians recommended killing it. The farmer, however, objected strenuously to parting with his steed. He said that his own grandfather, a major in the War of the Revolution had ridden an ancestor of the horse, and that his line had remained in his family ever since.

The horse has gone into honorable retirement in the hospital there.

Windmill 300 Years Old

After standing for nearly 300 years, Levenhath windmill, an Essex landmark near the main road from Colchester to Sudbury, has been demolished. It measured 50 feet to the top of the sails from the ground, and had a 32 feet spread of sails. The official oak beams were practically as good as new, and behind the sails, inside the top of the mill, was a striking piece of woodwork in the form of a toothed wheel 9 feet in diameter.

No Demand For Real Lice

Because the old adage "no lice no longer afford to purchase hand-made lace," and the machine-made product satisfies the new rich, a famous lace-making concern on Bond Street has closed its doors. The firm was established in the eighteenth century and at one time sold lace cut ruffles to London ladies.

Advantages Of Walking

Is a Great Aid to Health Says the Lord Mayor of London.

Sir Alfred Dower, the lord mayor of London, is a strong advocate of walking as an aid to health. In an article in the English press he said:

"I have always been devoted to walking, believing it to be the best and most natural exercise, as it is the most readily available. Generally speaking, anybody can walk four or five miles a day. It is the oldest of all health habits. Men were made to get about, not to vegetate or lounge. 'Anything induces a man for a good brisk walk it is over-eating. Yet it is after doing this that he needs exercise most. The laws of Nature are inexorable. They were made for mankind to observe, and great is the reward of their observance."

"Nor are these laws really hard to follow, while the benefits are cumulative. An hour's walking exercise every day, say, taken pleasantly for health's sake, will generally keep a man well, and will go far to restore health that has been impaired by neglect of this precaution."

A recommendation of this sort from a public man living in a city is, of course, meant for city men. If a man has been following a plough or a harrow all day, in which he would walk about ten miles, walking would not be needed. A quiet hour with a good book would be more suited to his needs.

Arid Desert Worth Millions

Valuable Fertilizer Comes From Region Where Nothing Will Grow

An open arid desert over which there is not more than half an inch of rainfall in a year, is still one of the most valuable assets. Not a tree or even a blade of grass except in imported soil. This is the nitrate country, which employs 50,000 people directly and indirectly five times as many, and in which something approaching \$200,000,000 is invested. There are over one hundred and seventy separate workings, each of which is the centre of a busy population. Yet every ounce of food, every yard of clothing, every cog and shaft of its huge machinery, every plot of water, even to be brought from a distance. For many miles around the country produces nothing but nitrate of soda. It is an amazing fact that the most valuable fertilizer of commerce comes from a region where nothing will grow, but it is a case of all fertilizer and no soil and no rain. In earlier days water was so valuable that it was a saying that was "cheaper to drink champagne than water is carried by pipes from far-off sources, some of which are two hundred miles distant.

Eat Sparingly

People Live Too Well For Their Own Good

Hosts of Americans live too well for their own good. It is time to speak of digging one's grave with one's teeth, but the saying is still true. The dining table may be a greater menace to the life of the business man than the office desk. It is significant in that regard that men still active at great age when asked about their modes of life (disagree) on a great many things but agree in the statement that they eat simply and eat sparingly. There are many such men still in harness at ages which in former generations would have marked them as fit only for the acre, there to sit "in second childhood and mere oblivion." Boston Transcript.

Working Only One Hour

Energetic Man Could Lay 879 Bricks In That Time

It is a little startling to hear of a man who laid 879 bricks in an hour, when we know that less than that number are usually laid in a day! It appears, however, that the thing is just possible for a very strong man for a single hour. To lay 879 bricks in an hour a man would have to lift three tons of bricks and mortar, and one has only to imagine the motions of lifting each brick with one hand, taking the mortar on to the trowel with the other, and laying and adjusting the brick and the mortar, to see what a terribly exhausting thing it must be to work at such a speed.

Not For Him

Mulligan was lying upon his death bed. Mrs. Mulligan was seated at his side, giving what small consolation she could offer under the circumstances. "Sure, an' Mike," said she, "is there anything I can do for ye before ye have us?"

"Mazard, my darlin'," said he, "I think I smell the odor of yer rosin' pork. I believe I cut out a bit up it." "I'm sorry, Mike," said she, "but I can't cut into that pork roast; we've saved it for the wake."

Prisoners From-Choice

Thousands Shut Themselves Away From World by Living "In a Rut"

An Iowa prisoner, after 30 years in the penitentiary, refuses a pardon. He has no desire to enter the outside world. He is afraid to do so. The confinement that was at first a punishment has become a solace and a protection. He knows that outside he would be homeless, destitute, incapable of competing with those who are familiar with its ways. So, while he refuses a pardon and remains at home in jail. He is a pathetic figure.

And on the "outside" there are thousands like him. There is a rut, too, about them. These are the prisoners of restricted minds, beliefs and initiative. Once they could not accept new visions, new theories. Now they are afraid to. They cling to the traditions against which they once rebelled, seeking in them comfort and protection. The old man "in a rut" loves the rut that kept him from advancing. It also offers him shelter. —New Orleans Item.

British Ports' Odd Industry

Salvaging Coal That Falls Overboard Is Skilled Operation

"Drugging" is a recognized industry in English ports. The professional "drugs," with the aid of long and specially constructed poles called "hitchers," saves coal during the process of coaling ship. The "drugging" fleet, a collection of queer little broad-beamed boats, is to be seen at work at all waterfront places where ships take in coal or discharge it. A certain amount of coal falls overboard into the river or harbor mud, from which it is retrieved by the "druggers," who wash it, take it ashore, and sell it to householders at a low price. Coal "drugging" is a skilled occupation, and one that is handed down from father to son.

Studying Birds From Air

Many Misconceptions Corrected By Observations of Air Pilots

Aeroplane has served to give the world some definite knowledge of the habits of birds in the air, according to Hugo Weigold, of the Hannover provincial museum, and this has corrected a number of previous misconceptions. No air pilot ever has reported birds higher than 12,000 feet, and most of them do not rise more than 1,000 feet in the air. The blue throat, once credited with a wing speed of 200 miles an hour, cannot actually do better than 25 miles, according to all pilots interested in ornithology.

One trouble with bird study from aeroplane is that the machines cannot go slow enough. Eight German Boats Salvaged Fishing for the German fleet which was sunk in Scapa Flow, June, 1919, goes on again and already eight destroyers have been brought up to the surface. The boats come up festooned with seaweed and barnacles, and are then taken to the shipyards for breaking up. The firm of salvagers expects to start on the raising of the 25,000 tons draughted Hindenburg next year.

Wheat of Merchandise Quality

Of the total estimated wheat yield of 1924, totalling 262,097,000 bushels, 95 per cent., or 250,099,000 bushels, is reported by crop correspondents as having proved to be of merchantable quality. Last year's corresponding figures were 96 per cent., or 254,394,000 bushels, out of 264,159,000 bushels.

Mould In Butter

To Prevent Mouldiness All Cream Should Be Pasteurized

Mould in storage butter is now of serious economic importance, and as a result of its damaging effect on the export trade a full investigation has been made. A bulletin covering the subject and giving the results of the investigation has just been published by the dairy and cold storage branch of the Dominion department of agriculture. According to the bulletin, cream as brought to the factory is generally infected by mould, but this infection is destroyed by pasteurization, consequently the trouble must come from the conditions surrounding the cream in the factory. Moulds have been found in cream pumps and in piping through which the cream passes in the factory. Wood is a principal field for production of mould, which is found in factory chimneys constructed principally of wood, and in the walls and ceilings of the churn rooms, in wooden butter boxes and in woodwork near the factory. All these sources of mould should be carefully guarded against. Great care must be given to the protection of the boxes from moisture. Wind carried the spores of mould from the neglected wood pile into the factory. Butter parchment and salt are also sources of infection, and so are water supplies, holding tanks and keels.

To prevent mouldiness in butter all cream should be pasteurized, all vats, pipes, pumps and churns cleaned thoroughly every day, parchment papers treated in hot brine solution, boxes should be made of well seasoned wood and kept in clean, dry places, salt stored in clean, dry rooms, and pure water used. Refrigerators must be kept clean and dry, the creamers should be well lighted and ventilated, and the interior walls painted yearly at least. Strict attention must be given to cleanliness, and systematic mould and yeast counts should be given to all the processes of manufacture, packing and storage.

Dean Inge On Divorce

Says It Is a Dark Stain On the United States

After stating that as a guest in this country he could not see his way clear to criticize American institutions, the Very Rev. William Ralph Inge, during the course of a lecture at Yale Divinity school, declared that "the statistics on divorce in America are a dark stain on a civilized country."

"The most important of the social evils in England," said the dean, "are betting and gambling, which have a more potent influence in ruining a man than alcohol, which ruins only a few. The second great evil is immorality. Marriage has become nothing more than an institution which lasts only as long as a momentary passion."

Mineral Production In B.C.

Official figures relating to the 1924 mineral production in British Columbia show that the output totalled \$18,621,097, an increase over 1923 of \$7,316,777, or 17.6 per cent. Placer gold production in 1924 amounted to 21,037 ounces; lode gold, 232,142 ounces; silver, \$3,111,169 ounces; copper, \$1,847,293 pounds; lead, 170,584,481 pounds; zinc, 79,120,970 pounds.

A school in Oregon has established a course in automobile dodging.

Three thousand years ago rope was made from bulrushes.

Where Wanderers Foregather

London's Unofficial Club One of Most Extraordinary in World

In the quiet upstairs room of a tavern, which stands within a few yards of Bond Street, London, there is to be found one of the most extraordinary unofficial clubs in the world, where wanderers from all the corners of the earth foregather for a space, as if by instinct, before passing on.

Like all taverns, its doors are open to everyone, but if you have never been yourself to the ends of the world, you will surely miss the peculiar atmosphere of the place and feel yourself to be an intruder.

In the space of a few square yards you can breathe the different airs of Stan, Kenya, Brazil, the Northwest Frontier, South Africa, Borneo, the Sudan and the Philippine Islands.

All these sons of Ismail are made welcome in the Inn by the waiters, who is beloved of all. In a queer sense she is a mother to them all, for she never forgets a face, however long it may have been since its possessor turned his wandering footsteps Londonwards, and she appears to keep in close touch with all their lives.

As each wanderer passes on, he leaves his mark in what must be one of the most remarkable visitors' books in existence. For in the address column are found the names of places known to none but the compilers of atlases and gazetteers.

The Mayas of Yucatan

Are Cleanest of People Says National Geographic Magazine

The descendants of the Indians who built the great cities of Yucatan in the tenth and fifteenth centuries still live and labor on the henequen plantations of the same region, says the National Geographic Magazine, the men working in the fields, the women at their household tasks.

No cleaner people live than the Mayas of Yucatan. It is safe to say, says the magazine, that every Mayan bathes at least once a day. It is said that the old Spanish law gave every man the right to bathe his wife, if she did not have a tub of water ready for his bath when he came in from work.

Syrians Discovered Glass

Egyptians Knew Art As Early As 1150 B.C.

The Egyptians are said to have known the art of making glass as early as 1150 B.C. The discovery of glass is said to have been made in Syria. Glass was in use in Rome in the reign of Tiberius, the second emperor of Rome, who was on the throne during the whole of the early ministry of our Lord. In the ruins of Pompeii, buried by an eruption of Mount Vesuvius on the Bay of Naples, Italy, in the year 79 A.D., glass windows are found showing that, among the wealthy, glass was in general use.

Something New In Radio

A radio diet of violin and piano was broadcast at Johannesburg recently with the players 40 miles apart. Both used headphones attached to crystal sets and were able to hear one another play so their performance synchronized perfectly. The violinist was in the study of the broadcasting station, while the sounds of the piano were carried 40 miles by land line.

Truth is mighty—and sometimes mighty scarce.

Homes are being built with every known convenience except low rent.

The World's Power House

North American Brains Have Done Much For Civilization

"North America has taught the world how to manufacture. The science of merchandising, the science of publicity, the science of mass production, and the application of science of industry, making possible a higher standard of living for millions, are the creations of North American brains." In the past 60 years North America has dominated three of the civilized world's great emotional epochs. In the late-sixties the spirit of Abraham Lincoln bestrode the world as no man had haunted it since Caesar. The next great emotional force was the robust egotism of the Roosevelt era. And then came the Woodrow Wilson world-convulsion of sentiment. Those epochs may have produced, in themselves, no great inventions, no material marks on the world's progress. But they were vital factors in the spiritual evolution that creates civilization in Europe. But where Europe has lost its force of creation, North America has become the power house for the world.—Vancouver Sun.

Trying To Be Right

People Make No Progress Merely By Being Good

The right way is the only way, and the rightness of an attitude or method goes down through all its relations. Rightness in mechanics and morals is basically the same thing. We make a great error in regarding "moral" as meaning "trying to be good"; it means trying to be right. Unless the parts of a machine are right, power cannot be delivered, service cannot be rendered. The only kind of precision that fits society together is more precision which is the science of right relations. We make no progress as long as we deny this. Our motive in this is not the attainment of some kind of goodness which is apart from life itself, but the attainment of inherent rightness so that this complex instrument which we call society may efficiently function. Morality is the mechanics of rightness.—Dearborn Independent.

Nutmeg Tree Very Useful

All Parts of Fruit Are Used In Tropics

The nutmeg tree is one of the most useful trees in the tropics. An ordinary tree will yield from 1,000 to 10,000 nuts in a year. All parts of the fruit are in demand for culinary purposes. In Singapore the natives eat the husks, and in drinking saloons they are supplied for the purpose of creating thirst. A delicious preserve is also prepared from the husks. The nutmeg is employed in medicine as a carminative stimulant, and for the relief of the so-called nutmeg butter—is used as an application for rheumatism. It contains from 3 to 8 per cent. of a volatile oil, and the substance myristicin, which possesses narcotic properties. Cases of poisoning as a result of chewing nutmeg have been recorded—a single nutmeg seriously affecting the cerebral functions of man.

"The Friend Of Man"

Dog Is Always Faithful and Gives Owner Unquestioning Affection

"The friend of man" is how the dog is described. Through good times and bad, whether luck is in or luck is out, the dog is true to his master. To the owner who treats him well, a dog, whether a pedigreed champion or a mongrel cur, will give unquestioning affection. It will love him while he lives and mourn him when he dies. "Faithful as a dog," is the saying. We should treat dogs kindly as faithful friends, not merely as "animals." Many a man and woman brooding in sorrow has been cheered and comforted by a cold, wet nose pushed into the hand, and the understanding look of sympathetic brown eyes. The bullying Bill Sykes was loved by his cur to the end. Ferdinand, despised by civilization, has just one faithful old friend—his dog.

The Planet Mercury

Mercury is the smallest planet, and the nearest to the sun. Owing to its proximity to the sun it is difficult to see it with the naked eye. Its mean distance from the sun is 26 million miles, while that of the earth is about 94 million miles. Mercury completes a revolution of its orbit in 88 days; it is about 3,000 miles in diameter; and its mass is only about one-thirtieth that of the earth.

Auction By Candle

The ancient custom of "selling by candle" is still practiced in England. A candle is lighted with a pin one inch below the top. The bidding starts and the auctioneer bids as the pin drops out, because of the flame falling down on it, gets the article for sale.

Party of Welsh Farmers for Canada

That Welshmen are among the most successful farmers in Canada is again proved by the fact that recently a party of sixty Welsh farmers sailed for the Dominion on the Canadian Pacific S.S. "Montrose" and several more similar parties are to follow. The party of sixty which the photograph is shown above have adopted as their slogan (in Welsh): "We've got farms in Canada, we don't want the dose." They are going to Alberta and Saskatchewan where six sections have been reserved for them under the Canadian Government Agricultural Settlement Scheme for placing 3,000 families on the land. Settlers from Wales are among the most successful settlers in Canada, and at Panora and Bangor, Saskatchewan, a most prosperous Welsh settlement has grown up and many Welsh churches and chapels built.

**WORLD HAPPENINGS
BRIEFLY TOLD**

All the miners in the Ruhr have joined the newly formed Rheinisch-Westphalia Coal Syndicate.

More than 500,000 boys and girls are now enrolled in the farm club work of the U.S. department of agriculture.

The bill providing for disposal of the cotton funds of the Canadian Expeditionary Force, passed the final stages of the House of Commons.

With very little debate the House of Commons approved the protocol between Canada and the United States, regulating the level of the Lake of the Woods.

In the hope of recouping the pearl industry in the Philippine Islands, the government has ordered the pearl banks around the Sulu archipelago closed for three years.

In spite of an appreciable decrease in the quantity of cattle handled, Canadian railways, as a whole, increased their operating revenue during last February, as compared with the same month in 1924, by \$861,949.

The House of Commons has passed a resolution giving settlers in certain sections of Southern Saskatchewan and Southern Alberta priority in the opening of further homesteads in these sections.

According to advices received at Tokyo from Seoul, Korea, a devastating forest fire started near Kankyo, Hokkaido province, sweeping through numerous villages and leaving thousands of persons homeless.

An increase of 65,271 in the total number of motor vehicles registered in Canada is shown for the last year as compared with 1923. Registrations in passenger cars and motor trucks produced an increase of 68,798 and 1,316 respectively in 1924 as against the previous year.

Japanese Launch Fine Cruiser

The Japanese navy's new cruiser, Naka, was successfully launched recently at the Yokohama quays. The cruiser is a vessel of 15,595 tons displacement, has four funnels and can make 33 knots, it is said. It is the largest warship ever launched at Yokohama, officials stated.

"A Babe in the House Is a Well-Spring of Pleasure"

Mrs. Carrie Deekham of 837 Van St., London, Ont., says: "I took Dr. Pierce's Favorite Prescription during my last pregnancy to keep up my strength. I had no sick stomach, nor any other distressing ailment such as usually come to the prospective mother, and my baby has been just as fine and well as can be. He is now eight months old and has never known a sick day. I would never hesitate to recommend Dr. Pierce's Favorite Prescription as a tonic and nerve in young motherhood, for I know that it helps in many ways, both the mother and the child."

Get this "Prescription" from your neighborhood druggist, in either liquid or tablet form, and write Dr. Pierce's Invalids' Hotel in Buffalo, N.Y., for free, confidential medical advice. Send 10 cents to Dr. Pierce's Laboratory, Bridgeport, Ont., if you wish a trial package of tablets.

Making Arctic Trip Safe As Possible

U.S. Navy Department Will Hold Driftblimps Ready in Case of Emergency

"With a view to affording a means for speedy rescue in case of mishap to the MacMillan expedition, which will start for the polar regions in June, plans will be made by the bureau of aeronautics of the U.S. naval department to dispatch the dirigible Los Angeles, or her sister ship, the Shenandoah, from Labeur to Etah, Alaska, should an emergency call be raised by the men while mapping the unknown region between Alaska and the North Pole.

For the first time in the history of Arctic exploration, an agency is at hand in the form of the two navy dirigibles to assure a quick response to any call of distress that may be radiated by MacMillan. The availability of radio intelligence and the ability of the navy to rush the Los Angeles or the Shenandoah to the rescue should the need arise, lends an element of safety to this expedition which was lacking in those that have penetrated the far north in the past.

Visit Of Earl Haig

Will Attend Convention of British Empire Service League

Field Marshal Earl Haig, who had command of the British armies in France and Belgium during the greater part of the war, is coming to Ottawa towards the end of June to attend a convention of the British Empire Service League. Delegates to the convention are coming from all parts of the British Empire. The British Empire Service League is an ex-soldiers' organization. The arrangements for the convention in the Canadian Capital are being made by the Dominion Command of the Great War Veterans' Association. Earl Haig will be the guest of His Excellency Baron Byng of Vimy, Governor-General of Canada, who was one of the leading generals under Field Marshal Haig during the Great War, while in Ottawa.

After the convention, Earl Haig intends to visit a number of places in Canada.

Miller's "Power" Powders can do no injury to the delicate child. Any child, or infant, in the state of adolescence, who is infested with worms, can take this preparation without a grain of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

British Empire Exhibition

Many New Features Are Being Shown

Practically all the dominions and colonies are again exhibiting this year at Wembley. The principal exhibits and buildings are devoted to Canada, India and Australia.

Among the new features to be shown at the exhibition will be a ro-bogean slide of 100 feet in height, modelled on the lines of the famous Cresta run of Switzerland. The exhibition, in full operation, employs 25,000 persons. The daily average attendance at last year's exhibition was 110,000, the maximum daily attendance being 121,000 persons.

The exhibition will continue until late in September, when it will close and fade into history, as there is little probability of it ever being held again. The exhibition will not be open on Sundays.

The University Of Jerusalem

Will Prove of Great Value to the Jewish People

The new University of Jerusalem, may be the beginning of a new renaissance of the east. But it may have an even greater value to the world than that. The Jewish genius, given a national home, and equipped for the first time for nearly two thousand years with a nerve-centre of its own, may give the world a foretaste of new thought and ideas comparable to its past—Manchester Guardian.

Purchase Prize Cattle

Lives-ock Producers' Association to Exhibit in Scotland

A large number of prize cattle exhibited at the recent Calgary show, have been purchased by the Live-stock Producers' Association, in order that a complete demonstration may be given this year in Scotland by the company of what the Western Canadian farmers can do in finishing steers.

No surgical operation is necessary in removing corns if Holloway's Corn Remover is used.

A favorite delicacy of the Eskimo is composed of what the Westerners call chocolate, and thrown into a seal-skin bag filled with whale oil.

For Aches and Pains Use Minard's Liniment

Negotiated Huge Credit

MONTAGU NORMAN

Governor of the Bank of England, who conducted the preliminary negotiations at Washington and Wall Street in connection with the \$300,000,000 credit Britain obtained before reverting to the gold standard.

Keeping Our Curiosity

Wondering About Things Makes Life More Interesting

There is perhaps only about one childish quality that should stay with us all our years, and that is our curiosity. If we keep on asking questions and wondering about things, life will keep on being interesting and growing bigger and better every day. But if we allow the routine of things, or a too great sense of satisfaction, to wear down and destroy our curiosity, the zest will largely go out of living, and with that the possibility of progress, and we will stand cumbered without prejudices and all the hampering tumbler of life.

And strange as it may seem, there will probably be many more questions to ask when one is eighty than there were when he was eight. Indeed, it is only when one has lived long and thought deeply that he begins to understand how to ask questions, and to see how big is the world that he does not know.

ECLIPSE FASHIONS

Exclusive Patterns

1053

A Variation of the Straight-line Frock

The silhouette still follows straight and slender lines, but much fullness is often added at the lower portion of the skirt by means of the circular flounce. A smart combination of materials is achieved by using a white and black printed silk for the main portion of the dress, and soft black satin for the collar, circular flounce and loosely knotted string ties. The model pictured, No. 1053, has short kimono sleeves with a seam on shoulder, and convertible collar. It is an unusually smart design for afternoon wear. Made in sizes 34 to 42 inches bust. As pictured, size 38 requires 2 yards 28 or 40-inch material for the upper part and 1 1/2 yards for the flounce. If dress is made of one material, size 38 requires 1 1/2 yards of 36 or 40-inch.

SUNDAY SCHOOL LESSON

MAY 17

SAUL BECOMES A CHRISTIAN

Golden Text: If any man is in Christ, he is a new creature. 2 Corinthians 5:17.

Lesson: Acts 9:1-19.

Devotional Reading: Psalm 32:1-11.

The Text Explained and Illuminated

Saul the Persecutor, verses 1, 2. In contrast with Philip's zeal in furthering the increase of believers, Luke now records Saul's zeal in hindering it, and begins his sentence therefore with a But. By means of a vivid metaphor, Luke shows us how Saul's presence brought terror to the hearts of the disciples whom he hunted; "But Saul, yet breathing threatening and slaughter against the disciples of the Lord, went unto the high priest." The metaphor is based on the fact that a person under stress of a great excitement breathes rapidly, pants, in his effort to give expression to his thoughts. From the high priest Saul asked and really obtained letters to the synagogues in Damascus (the followers of Christ had not yet withdrawn from the Jewish synagogues). The number of Jews living in Damascus was large; in a tumult under Nero ten thousand were put to death. The letters Paul obtained permitted him to arrest believers, whether men or women, and bring them bound to Jerusalem. Paul doubtless intended to return to Jerusalem like a Roman conqueror with his captives. At Jerusalem the captives would have been brought before the Sanhedrin for trial. "In the pride of his Pharisee's heart, he strikes out the idea to reverse the maxim of the Crucified Leader of the dead, and go into all the world and suppress the gospel in every corner" (Henry Drummond).

"DIAMOND DYES"

COLOR THINGS NEW

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Passion Players Get Orders

The American tour of Anton Lang and his Oberammergau associates to America has borne rich fruit in the way of orders for wooden statues and other objects of art. Carved images of Christ are especially in demand.

Worms cause fretfulness and rob the infant of sleep, the greatest nourishment to scratch which is the worst. Mother Graham's Worm Exterminator will clear the stomach and intestines and restore healthfulness.

A juniper tree, believed to be 3,000 years old, is still standing in the Cache National Forest in Utah.

Young man, if you can't marry a girl with dollars you are lucky to marry one with sense.

ITCHY ECZEMA ALL OVER FACE

In Pimples and Blisters. Healed by Cuticura.

"Eczema broke out in pimples and blisters and spread all over my face. It itched and burned causing me to scratch which did the worst. I could not sleep on account of the irritation, and could hardly talk because the sore eruptions on my face made my mouth." The trouble lasted several months.

"I tried everything I could get but nothing helped me. I began using Cuticura Soap and Ointment and got relief. I continued the treatment and in about eight weeks I was completely healed." (Signed) Wm. J. Romanchuk, Samburg, Sask.

Cuticura Soap, Ointment and Talcum are ideal for daily toilet uses. Sold by Druggists, Grocers, and Dealers. Price, 25c. Cuticura Shaving Stick 25c.

Phono-Film Is a Success

New Scientific Achievement Marked By Broadcasting of Address

An address by President Coolidge in which he founded a message of peace and prosperity, was broadcast from a specially prepared phono-film made at the White House, marking what was said to be the first attempt ever made to broadcast a voice from the motion picture screen.

The film which recorded both the movement and votes of the president, was shown at the Friars Club to visiting editors and publishers in New York, dinner guests of M. Koenigsberg, president of King Features Syndicate. International News Service and Universal Service. Dr. Leo de Forest personally supervised the making of the film and its projection, while the Radio Corporation of America took charge of the broadcasting.

A Powerful Projectile

Armor Piercing Shell Perfected For the British Navy

An armor piercing shell has been perfected for the British navy. Its mighty power to crush its way through the protective armor of battleships would have been thought impossible a few years ago, according to Sir Robert Hadfield, whose firm has perfected the shell. The shell is for 16-inch guns.

Sir Robert said he was not at liberty to disclose the tests applied to the projectile, but optimistically remarked that "the dream of experts and metallurgists for years has come through."

Should Sleep Seven Hours

It's all blank about early to bed and early to rise making a man healthy. Dr. Chester P. Brown, associate medical director in the United States, says a man ought to have seven hours' sleep out of 24. It doesn't make much difference when he gets it, so long as he gets it, and the man who stays abed until noon is conserving his health if it is a part of the seven hours needed.

A Finger Print Maze

More than 400,000 finger prints are recorded at Scotland Yard. Since this system was adopted in 1901, more than 250,000 criminals have been identified by this method.

Need 400 Men for Sugar Beet Fields

Four hundred men will be needed in Southern Alberta this season to do the work in connection with the raising of sugar beets on more than 5,000 acres for the new sugar factory now being built at Raymond.

Orders for these men were received last week by Labor Commissioner W. Smitten. The work is to be done under contract, starting with the blocking and thinning at once. For the blocking and thinning the contract price offered is \$9.50 an acre, for hoeing \$2.50 an acre, for weeding in September, \$1.50 an acre, total

of \$13.50 an acre. For harvesting \$10 an acre is being offered. A bonus of 75 cents a ton over 12 tons on the harvesting is being given. The first payment on the contract will be given on the completion of hoeing, the second after the weeding in September and the final payment following harvesting. Free housing is provided.

Lord Byng Going North

Governor General Lord Byng is to leave Edmonton on July 13, for a trip down the Mackenzie River to Aklavik in the Arctic. It is possible that he will be accompanied by Premier Greenfield

Fourth Annual Tour To The Pacific Coast

Special Train from Winnipeg via Canadian National Railways. Entertainment Provided for at Various Points of Interest En Route

Personally Conducted

Personally conducted tours offer the best opportunity for familiarizing oneself with the country traversed. This applies to our own country as well as to the older settled countries of Europe. Canadian National Railways has, for many years, commencing immediately after the close of school for the summer holidays, conducted special parties to the Pacific Coast via Prince Rupert. The tour of the year which will be the fourth will again commence at Winnipeg, from which point a special train of modern sleeping car equipment, dining car and radio observation car, will leave July 6th. After stopping at various points of interest, the train will arrive at Prince Rupert on July 11th. At this latter point, the party will embark on a palatial steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria, may have their tickets read "Victoria" as their destination without any additional cost.

This tour is an outing that appeals strongly to teachers as well to professional men, and business men and women.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes returning, etc.

Resume Weed Campaign

Appointment of field supervisors for the prosecution of the weed campaign throughout the province during the coming season, is now being made by the provincial department of agriculture. There will be 17 supervisors this year, an increase of three over last year. The territory of each supervisor is being made somewhat smaller, in order that the whole field may be covered more thoroughly. Two supervisors will be placed this year in the Peace River district, one south and the other north of the river. It is the intention of the department to conduct a more vigorous campaign than ever for the destruction of weeds.

A convention of the provincial government field supervisors and weed inspectors of the municipalities will be held at Olds on May 19 and 20. All the rural municipalities, towns and cities are being invited to send their weed inspectors to this convention, where a thorough discussion of the campaign for the season will be held.

Chinook School Literary Society

The fortnightly meeting of the Chinook School Literary Society was held in the School last Friday afternoon, Harold Stewart, the new president, in the chair. David Smith was elected vice-president, and Dorothy Neff, editor-in-chief of the school paper. The following program was presented:

Opening song "Oh! Canada" Recitation Alfred Deman Piano solo Annie Clapham Recitation Duncan McKenzie Essay on "General Wolfe" Ida [Marcy] Piano solo Raymond Deman

WEDDING BELLS

James—Murray

A wedding of local interest was solemnized recently in the Presbyterian Church, Dugald, Man., Rev. Wm. Mills Turnbull officiating. Margaret Elizabeth Murray, third daughter of the late Mr. and Mrs. W. Murray of Dugald, was given in marriage to Mr. Harry James, of Halifax, N.S.

The bride and groom are now residing at Saskatoon. Both Mr. and Mrs. James are well known in Chinook, Mr. James having resided in this district for some years. His bride, who is a sister of Mrs. A. Aitken, while visiting in Chinook district made many friends.

Friends of Miss Florence Crane will be interested to learn of her marriage to Dr. H. Cowan, of Hamilton, Ont., which took place on April 8th in Toronto. Mrs. Cowan is a cousin of Mr. Richard Stewart and was a visitor in the Chinook district previous to her missionary tour in Central Africa.

First Things First

We live in one of the most needy and critical generations of history, when a shaken civilization is striving desperately to get on its feet again, when there are great enterprises to serve, great books to read, great thoughts to think, and yet some live, like a child's doll, are stuffed with sawdust. Many of us are absorbingly busy with trivialities. The things that really matter are crowded out by things that do not matter. We have missed the primary duty and privilege of life—putting first things first. Hear this subject discussed next Sunday evening at the Chinook Union Church.

The Dairy Pool

aims to—
save 6 to 8 per cent on the price of butterfat for the producers by eliminating agents.
reduce railroad tolls
reduce handling charges and overhead costs.
stabilize markets.

The Livestock Pool

aims to—
increase selling advantages by controlling a large volume of stock.
effect economies in handling.
protect the producer against excessive dockage charges.
protect the producer against a slump in price by stabilizing the market.

The Poultry Pool

aims to—
stabilize and extend markets
gain for the producer the full benefit of the price paid for his product.
provide for storage of product in times of peak production.

To Farmers and Farm Women:

These are YOUR POOLS. Their success will depend on your support. The best evidence of your belief in co-operative marketing is your signature to a contract.

DRIVE FOR MEMBERSHIP

Canvassers will visit you between June 8 and 28. Be ready to sign up then, if not before.

For contracts or information write—

EXCURSIONS

MAY 15th TO SEPT. 30th. Final Return OCT. 31, 1925

Eastern Canada

The Eastern Canada tour includes an optional route arrangement—via all rail or rail and lake. VISIT
MINAKI THE HIGHLANDS OF ONTARIO
NIAGARA FALLS THE 1,000 ISLANDS
THE ST. LAWRENCE
THE MARITIME PROVINCES

A cruise on the Great Lakes from Port Arthur, Port William and Detroit is one of the most enjoyable experiences that can be imagined. The majestic ships (S.S. "Noronic," "Hamonic," "Itornic") of the Northern Navigation Company form the water connection of what is known as the Canadian National Lake and Rail Route to the East.

Full information gladly given by J. T. KERR, TICKET AGENT, CHINOOK. Phone 3.

JASPER PARK LODGE TO STOP AT

THE TRIANGLE TOUR

The finest combination rail and ocean trip on the continent. It embraces a rail journey westward from Mt. Robson Park to Prince Rupert. SIDE TRIP TO ALASKA MAY BE INCLUDED. Southward to Vancouver, a distance of 550 miles, on palatial ocean-going steamships. Leaving Vancouver by rail, the third leg of the triangle extends northward through the Valley of the Fraser and Thompson to Jasper National Park.
